Premium Listings

Time-based featured placement for eligible listings

Meaning: Premium means a featured listing. While active, a property gets a Premium badge and can be highlighted on the website home page and in the Premium listings section/page. This is not an external paid ad campaign.

Time and payment options

Each booking has a start and end date (or a no-end option where allowed). Future start dates create a Scheduled booking; the listing is featured while Live; it stops being featured at expiry or when stopped.

Option	How it works
Plan/package Premium	Uses the account's Premium quota. The modal shows used/remaining slots, monthly reset and duration limit. Duration options depend on the plan.
Credits	If available, pay credits instead of using the plan slot. The screen shows cost and balance; supported periods are typically 7, 15 or 30 days.
Super Admin	No partner plan quota; the screen shows the configured maximum duration or no-end option.

Quota/refund rules: A monthly plan slot counts in the month of the booking's start date, even if stopped early. Cancelling before start returns the slot. For credit bookings, cancelling before start returns credits; stopping after the booking starts does not refund them.

Tester workflow - book Premium

1. Open Premium. Review All, Live and Scheduled, current date periods and monthly quota/remaining slots.
2. Choose Add Premium. Search and select a disposable eligible Property or Commercial listing; verify its title/reference.
3. Select Plan Premium or Credits if offered. Check allowance, credit cost and available balance.
4. Select an allowed day preset, start date and end date. Review summary before confirming with an approved test account.
5. Refresh the list and verify status, dates, quota/credit impact and selected listing.

Verify featured behavior

Public website checks

1. For a Live test booking, open the public home page and find the featured listing. Check badge, title, image, link and details.
2. Open the public Premium listings page and confirm the same listing appears while its booking is Live.
3. For a Scheduled booking, check it is not featured before its start date. At the start date, it should become live (use controlled date simulation if available).

Edit, stop and expiry workflow

1. Edit dates for a disposable booking where allowed and confirm summary, period and status update.
2. Cancel a future booking. Confirm it leaves Scheduled and the plan slot or credits return as applicable.
3. Stop a Live booking. Confirm badge/home/Premium placement is removed; plan quota remains counted if monthly, and started credit booking is not refunded.
4. Test expiry with a short period/controlled clock. Confirm it is no longer featured while the underlying listing remains active.

Expected results

- [ ] Correct listing is featured on home page/Premium section only while booking is Live.
- [ ] Live/Scheduled/ended state matches dates; future bookings do not show early.
- [ ] Plan allowance and credit price/balance are correct and visible before confirmation.
- [ ] Cancellation and early-stop quota/refund behavior follows the payment rules above.
- [ ] Expiry/removal clears Premium badge and placement without deleting the property.
- [ ] Properties and Commercial listings behave consistently in Premium menu and website.

Test notes

Use a test listing and sandbox account. Record account/plan, listing ID, payment type, quota before/after, credit cost, start/end dates, CRM status and public URL. Do not spend live credits or plan slots without authorization.
