Reports

Module purpose, hands-on test workflow and expected results

> **Access:** Summarize account performance across sales, properties, leads and agents for review and export.

What this module does

Summarize account performance across sales, properties, leads and agents for review and export.

Tester workflow

1. Open each report tab (Sales, Properties, Leads, Agents).
2. Set date range and available filters; compare totals with known test records and detail pages.
3. Change sort/grouping, refresh, and export/download if available.
4. Check empty date ranges..

Expected results

- [ ] Report totals and labels match the filtered scope/date range; changing filters refreshes all relevant values.
- [ ] Empty ranges show a clear empty/zero state.
- [ ] Export reflects selected filters.
- [ ] Record exact date range, timezone and sample records for discrepancies..

Test notes

> **Bug report:** Include module, role/account/plan, test record ID, exact steps, expected vs actual result, timestamp and screenshot. Use test data only; mask personal data and do not perform live billing, publishing, destructive, or external integration actions without authorization.
