# Plans

Module purpose, hands-on test workflow and expected results

> **Access:** Review subscription plan, features, limits, invoices and payment/upgrade options for the account.

## What this module does

Review subscription plan, features, limits, invoices and payment/upgrade options for the account.

## Tester workflow

1. Open Plans and inspect current plan, usage/features, renewal/expiry and invoice history.
2. Compare plan limits with visible account usage.
3. Review upgrade/checkout flow only in sandbox; do not confirm a live payment.
4. Open an invoice and verify amount/date/status..

## Expected results

- [ ] Current plan and feature entitlements match account access; limits and renewal details are readable.
- [ ] Invoice details match selected record.
- [ ] Checkout clearly shows price before payment and sandbox/cancel behavior works.
- [ ] Never enter real payment data..

## Test notes

> **Bug report:** Include module, role/account/plan, test record ID, exact steps, expected vs actual result, timestamp and screenshot. Use test data only; mask personal data and do not perform live billing, publishing, destructive, or external integration actions without authorization.
