MW REALTY · TESTER HANDBOOK · PROJECT DOCUMENT P4

Test Data

Rules, ready-made sample values and boundary values for testing MW Realty without touching real people, companies or money.

Scope: All test environments (never production). Covers test-data principles, sample data sets for each business scenario (accounts, listings, leads, plans and coupons, ads, tickets, imports, compare and insights, AI chat), Stripe test-mode payment data and boundary values taken from the validation rules in the code. Every name, email, phone and permit number below is fictitious.

1. Principles

- Use only the test accounts listed in Application Access, Roles & Permissions, or accounts you create with a test mailbox you control. Never use a real buyer's, agent's or company's details.
- Start every record you create with "TEST" or "QA" (titles, names, references, coupon codes, ad names, ticket subjects) so it can be found and cleaned up.
- Emails: use the `example.com` domain or the shared test inbox, for example `qa.agency01@example.com`. Use a new email and phone whenever you need a fresh lead: the system merges enquiries with the same email or phone (the last 9 digits of the phone) into one lead.
- Phones: UAE format with country code +971 picked from the list and the number typed without it, 7-13 digits. Use the reserved-looking ranges in this document, for example +971 50 000 0001. Never use a real person's number.
- Money: all prices are entered and stored in AED. Other currencies are only a display conversion.
- Permits: use fictitious numbers that start with a test prefix (for example `QA-RERA-0001`). Never copy a real Trakheesi, DTCM or ADREC permit number from another company's advert. Each permit number may be used on one listing only.
- Licence numbers (ORN, BRN, TRN, trade licence): fictitious values such as `QA-ORN-1001`. Do not use real brokers' numbers.
- Documents and images: sample images and dummy PDFs only, within the size limits in section 8. No real Emirates IDs, passports or trade licences.
- Integrations: do not connect real Facebook Pages or real Property Finder accounts unless the project lead provides test ones.
- Payments: Stripe test mode and Stripe test cards only (section 7). If a real payment page appears, stop and report it.

3.2 Listing Review (duplicate and risk) data

Purpose	How to prepare	Expected
Same unit, another agency	Agency QA 01 and Agency QA 02 each save a Dubai Marina sale apartment with unit number `QA-1203` in the same location.	The older listing stays live; the newer is held in Listing Review.
Same unit, same agency	Agency QA 01 saves a second listing with unit `QA-1203`, same location and purpose.	Refused on save ("Unit QA-1203 in this location is already listed ...").
Price far below	One listing priced under 60% of the median price per sq.ft of at least 5 similar live listings.	Risk signal, listing stays live with a flag.
Details don't add up	Title "TEST 2 Bed Villa in Dubai Marina" on an Apartment with 3 bedrooms in JVC.	Risk signal "Listing details don't add up".
Size too small	Villa with size 900 sq.ft (minimum 1,000).	Risk signal.

4. Leads

4.1 One lead per source

Use a new email and phone per row (for example `qa.lead01@example.com` to `qa.lead12@example.com`, +971 50 100 0001 to +971 50 100 0012).

Source (as stored)	How to create it	Lands with
Website	Property details > Enquire About This Property > Send Enquiry	The listing's owner and agent
Book Viewing	Property details > Request Viewing	Listing owner
Brochure Download	Property details > download brochure (contact details first)	Listing owner
Floor Plan Download	Property details > download floor plan	Listing owner
Agent Profile / Agency Profile	`/agent-details/{slug}` or `/agency-details/{slug}` request form	That agent or agency
Custom Request	`/properties` > Custom Property Request	Super Admin pool (unassigned)
AI Chatbot	AI chat > "Want to keep chatting?" form	Website Leads pool
Landing Page	Form on a landing page `/{slug}`	Website Leads pool and Admin > Enquiries
Direct Lead	CRM > Leads > Add Lead without choosing a source	Signed-in account
Referral, Walk-in, Social Media, Property Portal	CRM > Add Lead choosing the source	Signed-in account
Import	CRM > Leads > Import > Direct import (Excel)	Signed-in account
Facebook Lead Ads (ad set name)	Leads > Import > Facebook leads sample CSV, or a test Facebook Page	Connected account
Direct Sale	Mark a listing as sold to a new buyer	Listing owner

4.2 Stages, statuses and follow-ups

- Stages (shared defaults): New (default), Hot Buyer, Active Buyer, Active Seller, Negotiation, Connected, Closed (closed stage), Dropped (closed stage). Put at least one lead in each.
- Status: Active (new leads) and Inactive (lead menu > Mark as Inactive).
- Duplicate check: send a second enquiry with the same email in upper case, and one with the phone written as `00971 50 100 0001` or `050 100 0001`; both must merge into the existing lead.
- Follow-ups: one Call overdue (due yesterday), one WhatsApp due today, one Email next week, one completed with an outcome, one cancelled with a reason.

4.3 Lead import sample rows

Name	Email	Phone	Stage	Source	Tags	Expected
QA Import Lead 01	qa.import01@example.com	+971501000101	New	Referral	VIP	Imported
QA Import Lead 02	(empty)	+971501000102	Hot Buyer	Import	QA-NewTag	Imported; missing tag created
QA Import Lead 03	(empty)	(empty)	New	Referral		Rejected: email or phone required
QA Import Lead 04	qa.import04@example.com		NoSuchStage	Referral		Rejected: unknown stage

5. Plans, credits and coupons

Item	Test values
Plan switches	Free to Pro (upgrade, charged now), Pro to Basic (downgrade at renewal, no refund), Cancel auto-renew (drops to Free at period end), monthly vs yearly price.
Upgrade request flow	Stripe not configured on the environment: Upgrade Now creates a request; approve it in Admin > Clients > Plan Upgrade Requests.
Coupon, percent, once	Code `QATEST10`, percent 10, duration once, all plans.
Coupon, fixed, repeating	Code `QATEST-50AED`, fixed 50, duration repeating 3 months, only Pro.
Coupon, forever, limited	Code `QA_FOREVER`, percent 100, forever, max uses 1, max uses per user 1.
Invalid coupon codes	`qa test` (space: refused, letters, numbers, - and _ only), a 41-character code, an expired code (expiry yesterday), a code limited to another plan.
Credits top-up	1,000 credits (default), the minimum and maximum set in Admin > Credits, one below the minimum, one above the maximum.
Credits grant (Admin)	1 credit, 1,000,000 credits, note of 120 characters, note of 121 characters.
Credits spend	Extra listing after the plan allowance is used; Premium for 7, 15 and 30 days; an ad beyond the plan's ads per month.
Expiry	Admin > Credits validity set to 1 day on a QA environment to see an "Expired credits" line next day.

6. Ads, tickets, imports, compare, insights and chat

6.1 Advertisements

Case	Values
Normal booking	Ad name "TEST Ad 01", banner image 2400 x 450 px JPG under 8 MB, phone image 800 x 400 px under 4 MB, link to own listing, start next full hour, length 3 hours.
Day booking	Length 2 days (only on a plan whose longest booking is at least 48 hours).
Too long	Length longer than the plan allows: refused.
Too far ahead	Start 61 days ahead: "Ads can be booked up to 60 days ahead."
Full slot	Book the same page and hour from accounts until it shows "Full".
Review	Approve one, reject one with a reason (max 500 characters), leave one unreviewed past its end (closed and refunded).
Per-language text	Small heading 30, title 60, short text 120 characters (and one character more for each).

6.2 Support tickets

Field	Valid	Invalid
Issue type	Account & Profile, KYC / Verification, Property Listings, Leads & CRM, Plans & Subscription, Payments & Invoices, Agency & Agents, Technical Issue / Bug	empty
Priority	Low, Normal, High, Urgent	empty

File-level cases: a `.pdf` file (refused), an 11 MB file (refused), a heading row only, a CSV separated by semicolons, a file with 2,001 listing rows (refused, max 2,000), a second upload while one import is running.

6.4 Compare and property insights

- Compare sets: 2 Dubai sale listings (minimum); 5 mixed listings (maximum); a 6th pick (refused); one sale plus one rent (price rows do not rank); a Golden Visa case at AED 2,000,000 and one at AED 1,999,999.
- Fee check: a Dubai sale at AED 1,000,000 must show buying fees AED 65,780 and total cash needed AED 1,065,780.
- Rent check: Dubai, AED 100,000 per year, unfurnished apartment, 1 cheque, no stated deposit: move-in AED 112,470, year AED 110,470.

- Market Insights: a community with at least 3 similar listings or deals (figures shown) and one with fewer than 3 ("Not enough data yet").
- Currencies: AED, USD, EUR, GBP, INR (home-country notes) and one other active currency.
- Shared link: `/compare?slugs=<slug1>,<slug2>,<slug-of-an-offline-listing>`.

6.5 AI chat prompts

Language	Prompt	Checks
English	2 bedroom apartment for rent in Dubai Marina under 120,000 a year	Up to 6 cards with "N% match" and reasons
English	Villa for sale near a school in Arabian Ranches, budget 5 million	Budget and "Near: School" chips on the lead's insights

Chat details form: name "QA Chat Lead 01", email `qa.chat01@example.com`, phone +971 50 200 0001.

7. Payment test data (Stripe test mode)

The application takes card payments through Stripe (plan checkout and credit top-ups, currency AED). Use these only when the project lead confirms the environment uses Stripe test keys.

Card number	Result	Use for
4242 4242 4242 4242	Succeeds	Plan purchase, upgrade, credit top-up
4000 0000 0000 9995	Declined (insufficient funds)	Error message, nothing charged, no plan change
4000 0000 0000 0002	Declined (generic)	Error message
4000 0025 0000 3155	Requires 3-D Secure authentication	Complete and fail the challenge
5555 5555 5555 4444	Succeeds (Mastercard)	Card brand display

With every test card: any future expiry date (for example 12/34), any 3-digit CVC, any postcode, cardholder name "QA Tester" (max 60 characters). Never enter a real card. If Stripe is not configured on the environment, plan changes become upgrade requests and top-ups are unavailable.
