MW REALTY CRM · TESTER HANDBOOK · MODULE 12

Sold Listings

Marking a listing sold or rented with proof documents, the Sold Listings register, and putting a listing back on the market

Where: CRM sidebar › Listings › **Sold Listings** (`/crm/sold-listings`). The sale itself is recorded from the handshake icon **Mark as sold / rented** on a Properties or Commercial listing card. **Who:** Super Admin, Agency, Agent. **Shown only when** the account can see at least one sold or rented listing. Needs KYC approval.

1. What this module does

When a deal closes, the user marks the listing **Sold** or **Rented**, links the buyer / tenant (an existing lead or a new one) and uploads two proof documents. The listing is taken off the website and moves from Properties / Commercial to **Sold Listings**. The buyer's lead is moved to the won stage and counted in the Sales report on the sale date. A sale can be undone with **Revert**.

“Mark as sold / rented” popup

Outcome (Sold / Rented), **Sold price** or **Rent (agreed)**, **Sale date** or **Rented on**, **Lease ends** (rented, optional), **Commission** (optional), **Buyer/Tenant** (**Existing lead** / **New buyer**), **Notes**, **Proof of the deal** (two uploads, optional **Document password**). Button **Mark as sold** / **Mark as rented**.

Sold Listings page

Tiles **Sold**, **Sales Value**, **Rented**, **Rental Value**. Search + type filter (**Sold & Rented** / **Sold** / **Rented**), **Filter**, **Clear**. Columns **Property**, **Outcome**, **Price**, **Date**, **Buyer / Tenant**, **Agent**, **Account** (Super Admin), and action icons. Link **Sales Report**.

2. How it works (business rules)

Listing card › Mark as sold / rented → Off website → Sold Listings → Revert (optional) → Back in Properties

- **Effect of marking sold / rented:** the listing becomes inactive (off the home page, listing pages, map and search), its Premium is removed, and it disappears from the Properties / Commercial lists. Success message: “Marked sold. It is now off the website and listed under Sold Listings.” (or “Marked rented…”), then the browser opens Sold Listings.
- **Default outcome:** a listing for rent opens with **Rented** selected, others with **Sold**. The price field is pre-filled with the listing price.
- **Buyer — Existing lead:** searchable list (name, email, phone), 20 at a time, more on scroll. Leads that enquired about this listing come first with the tag “Enquired on this listing”. Only leads the user can see in their own CRM are offered (Super Admin: all leads).
- **Buyer — New buyer:** a new lead is created for the listing owner (source “Marked sold”), linked to the listing and assigned to the listing's agent if it has one.
- **Lead:** moved to the owner's won stage (a “Closed Won” stage is created if none exists), closed on the sale date, and a timeline entry is added, e.g. “Bought <title> (ref) for AED 1,850,000 on 09 Oct 2026”.
- **Documents:** ownership document (title deed) and contract (Form F / MOU for a sale, Ejari for a rental) are both required. They are stored privately and open only through Sold Listings for users who can access the listing.

- **Revert** (“Put back on the market?”): removes the sale data and the two uploaded documents, and makes the listing active again **only if** it was active before the sale and its permit review still allows it to go live. The lead keeps its history (a “reverted” timeline entry is added); its stage is not changed back.
- **Totals** on the tiles cover all sold / rented listings the user can see, not only the current filter or page.
- **Menu:** Sold Listings appears in the sidebar only when at least one sold / rented listing is visible to the user.

3. Who can do what

Action	Super Admin	Agency	Agent
See Sold Listings	**All accounts (Account column)**	**Own listings**	**Own + agency listings assigned to them**
Mark as sold / rented	**Any listing**	**Own listings**	**Own + assigned agency listings**
Open proof documents	**Yes**	**Listings they can access**	**Listings they can access**
Revert	**Yes**	**Listings they can access**	**Listings they can access**
KYC pending	**n/a**	**No access**	**No access**

No plan gate on this module. The **Sales Report** link opens Reports, which may itself be plan-locked.

4. Fields and validation (Mark as sold / rented)

Field	Required	Rules / messages
Outcome	Yes	Sold or Rented.
Sold price / Rent (agreed)	Yes	Number, 0 or more.
Sale date / Rented on	Yes	Today or earlier (future dates blocked).
Lease ends	No (Rented only)	Must be after Rented on.
Commission	No	Number, 0 or more.
Existing lead	If Existing lead	“Pick a lead from the list, or switch to “New buyer”.”
New buyer: Full name	If New buyer	“Enter the buyer's name.” Max 255.
New buyer: Email / Phone	One of them	“Add an email or phone number for the buyer.” Email must be valid; phone max 30; country code default +971.

Field	Required	Rules / messages
Notes	No	Max 2000.
Property ownership document (title deed)	Yes	PDF, JPG or PNG, max 10 MB. Missing: “Upload both documents: Property ownership document (title deed) is missing.” Wrong type: “The ownership document must be a PDF, JPG or PNG.”
Sale contract (Form F / MOU) / Ejari (official DLD document)	Yes	PDF, JPG or PNG, max 10 MB. Wrong type: “The contract must be a PDF, JPG or PNG.”
Document password	No	Max 255. Shown later behind the key icon.
Already sold	—	“This listing is already marked sold.” / “…rented.”

5. Test scenarios

Priority: **High** core flow / data / access · **Medium** · **Low** cosmetic.

	Scenario	Steps	Expected result
SL-01	**Menu hidden with no sales** Medium	1. Sign in as an account with no sold / rented listings.	No “Sold Listings” item in the sidebar.
SL-02	**Mark sold — existing lead** High	1. Properties › card › handshake icon. 2. Sold, price, today's date, pick a lead tagged “Enquired on this listing”. 3. Upload both documents; **Mark as sold**.	Message “Marked sold. It is now off the website and listed under Sold Listings.”; Sold Listings opens with the row (Outcome Sold, price, date, buyer, agent). Sidebar item now visible.
SL-03	**Listing off the website** High	1. After SL-02 open the old listing URL, the listing pages, search and map.	Listing no longer shown anywhere public (allow ~3 min cache). Not in CRM Properties list.
SL-04	**Lead moved to won** High	1. Open the buyer lead from the row.	Stage = won stage (or new “Closed Won”). Timeline entry “Bought <title> (ref) for AED … on DD Mon YYYY”.
SL-05	**Mark rented — new tenant** High	1. On a rent listing open the popup (Rented preselected). 2. Rent, Rented on, Lease ends; **New buyer** name + phone. 3. Upload title deed and Ejari; **Mark as rented**.	Labels change to Rent (agreed) / Rented on / Tenant / Ejari. Row shows Outcome Rented and “until DD Mon YYYY”. A new lead exists in Leads with source “Marked sold”.
SL-06	**Required documents** High	1. Fill all, upload only one document; submit.	“Upload both documents: … is missing.” Listing not changed.
SL-07	**Wrong file type / size** Medium	1. Upload a .docx as contract; then a PDF over 10 MB.	“The contract must be a PDF, JPG or PNG.”; size error for the large file. Not saved.
SL-08	**No lead picked** Medium	1. Existing lead mode, nothing picked; submit.	“Pick a lead from the list, or switch to “New buyer”.”
SL-09	**New buyer without contact** Medium	1. New buyer: name only; submit. Then empty name.	“Add an email or phone number for the buyer.” / “Enter the buyer's name.”
SL-10	**Date and lease rules** Medium	1. Try a future sale date. 2. Rented: Lease ends before Rented on.	Future date not selectable / refused. Lease ends before start is refused.
SL-11	**Lead search in popup** Low	1. Type part of a name, email, phone; scroll the list.	Matching leads; more load on scroll; no match: “No leads found. Use “New buyer” to add them.”
SL-12	**Tiles and totals** Medium	1. Compare tiles to the rows.	Sold / Rented counts and values equal the sum of all your sold / rented listings (all pages).

	Scenario	Steps	Expected result
SL-13	**Search and filter** Medium	1. Search by title, ref no, city, buyer name; **Filter**. 2. Choose Rented; then **Clear**.	Matching rows only; URL keeps `?q=&type=`. No match: “No sold or rented listings match.” Clear restores all.
SL-14	**Pagination** Low	1. With more than 20 rows use pagination.	“Showing X–Y of Z”; newest sale date first.
SL-15	**Open proof documents** High	1. Click the title-deed icon and the contract icon.	Each file opens in a new tab. Key icon shows the document password; note icon shows notes.
SL-16	**Documents are private** High	1. Copy the document address; open it signed out or as another account.	Not shown (access refused / not found).
SL-17	**Price column details** Low	1. Sell for a price different from the listing price, with commission.	Bold sold price; small “listed AED …” and “commission AED …”.
SL-18	**Revert** High	1. Click **Revert**, confirm.	Dialog “Put back on the market?”. Row disappears; listing back in Properties; active again and on the website if it was active before. Lead keeps history with a “reverted” entry.
SL-19	**Revert inactive / expired permit** Medium	1. Sell a listing that was inactive (or whose permit has expired meanwhile); revert.	Listing returns to Properties but stays inactive / off the website.
SL-20	**Revert deletes documents** Medium	1. Revert, then mark sold again.	Old documents are gone; new uploads are required.
SL-21	**Premium removed on sale** Medium	1. Mark a Premium listing sold.	Listing no longer on Premium page or website Premium sections.
SL-22	**Sales report** Medium	1. Click **Sales Report**.	Reports › Sales opens; the sale counts on its sale date (if Reports is in your plan).
SL-23	**Agency agent on assigned listing** High	1. Agency assigns a listing to its agent. Agent marks it sold. 2. Check as agent and as agency.	Both see the row in Sold Listings; documents open for both.
SL-24	**Other account's sale** High	1. As Agency B, try to open Agency A's document or revert URL.	Refused / not found. Rows of A never shown to B.
SL-25	**Super Admin global view** Medium	1. Open Sold Listings from Admin › CRM.	All accounts' sales with the **Account** column (“MW Realty” for MW Realty's own listings).
SL-26	**KYC pending** Medium	1. As KYC-pending account open `/crm/sold-listings`.	No data shown (“Your account is pending Super Admin approval.”).
SL-27	**Phone width** Low	1. Open page and popup at ~375 px.	Tiles 2 per row, table scrolls sideways, popup fields stack.

6. Expected results checklist

- [ ] Sold / rented listing is off the website and out of Properties / Commercial.
- [ ] Both proof documents are required, private, and open from the row.
- [ ] Buyer lead is linked, moved to won, and has a sale timeline entry.
- [ ] Tiles show correct counts and values.
- [ ] Search, type filter, Clear and pagination work; URL keeps filters.
- [ ] Revert puts the listing back, respecting its previous active state and permit.
- [ ] Users see only sales on listings they can access; Super Admin sees all.

7. Known behaviour (not bugs)

- The menu item only appears once there is at least one sold / rented listing.
- Revert permanently deletes the two uploaded documents (the confirm dialog does not say so).
- Revert does not move the lead back to its previous stage.
- A reverted listing may stay inactive if it was inactive before or its permit no longer allows it.
- Removed Premium is not restored by Revert.
- Lease ends is optional, and listed / sold prices may differ.

Test-data cautions: use disposable listings and fictitious buyers only. Upload dummy PDFs / images — never real title deeds, contracts, Ejari or ID documents. Do not mark real customers' listings sold.

8. Reporting a bug

Include: role and account, listing reference, outcome (sold / rented), price and dates entered, buyer mode, files used (type and size), what the row / website / lead showed, time, expected vs actual, screenshot. Use test data only.
