MW REALTY CRM · TESTER HANDBOOK · MODULE 16

Listing Settings

The watermark (logo or text) stamped on listing photos: setup, position, size, opacity, who it applies to, and the plan lock

Where: CRM sidebar › Listings › **Listing Settings** (`/crm/listing-settings` ; Super Admin also `?tab=accounts`).
Who: Super Admin (default watermark + list of accounts), Agency and independent Agent (own watermark), agency's Agent (read-only view of the agency's).
Locks: KYC approval required (“Unlocks after KYC approval”). Paid-plan feature “Listing settings (watermark)”: without it the menu shows a padlock “Upgrade your plan to unlock this” and the page shows the **Unlock listing settings** card.

1. What this module does

A watermark brands listing photos. When a photo is uploaded to a listing, the watermark is **burned into the image file**, so it appears everywhere the photo is shown (CRM, public website, portals). Each agency or independent agent can set their own logo or text watermark. Super Admin sets a **default watermark** used for MW Realty's own listings and for every account without its own.

Watermark tab

On/Off switch, **Type** (Logo / Text), logo upload or text & colour, **Position** grid (9 spots), **Opacity** and **Size** sliders, **Cancel** / **Save changes**.

Preview

Sample listing photo showing the watermark exactly where and how big it will be. When off: “Watermark is off — photos are uploaded without it”.

Agency & agent watermarks

Super Admin only: search, All / On / Off filter, table **Account**, **Watermark**, **Position**, **Opacity · Size**, **Status**, **Updated**.

2. How it works (business rules)

Save watermark settings → Upload photos to a listing → Watermark stamped into each new photo → Shown on CRM and public site

2.1 Which watermark a photo gets

1. The listing owner's own watermark, if it is **On**, complete (a logo uploaded, or text entered) and the owner's plan includes Listing settings. For an agency's agent the owner is the agency, so the **agency's** watermark is used.
2. Otherwise Super Admin's **default watermark**, if it is On and complete.
3. Otherwise no watermark.

- **Only new uploads.** Photos already on a listing are not changed when settings change. To see a new setting, upload a new photo.
- Applies to listing gallery photos uploaded when creating or editing a listing, and to photos imported from Property Finder. Brochures and floor-plan files are not watermarked.
- **Size** = width of the watermark as a % of the photo width (5–80). **Opacity** 5–100%. **Margin** from the edge = 3% of the photo's shorter side. Text uses a bold font sized to fit the chosen width.
- Positions: Top left, Top centre, Top right, Middle left, Centre, Middle right, Bottom left, Bottom centre, Bottom right.

- Logo: PNG, JPG or WebP up to 4 MB, stored as PNG (transparency kept, max 1600 px wide). Uploaded photos are saved as JPEG on a white background.
- Colour swatches: white, black, navy, red, plus a custom colour picker.

2.2 Save messages

Who / state	Message
Account, watermark On	“Watermark saved. It will be added to every listing photo you upload from now on.”
Account, watermark Off	“Watermark settings saved. Yours is off, so the MW Realty default watermark (if any) is used.”
Super Admin, On	“Default watermark saved. It goes on your listings and on every agency / agent without their own, for photos uploaded from now on.”
Super Admin, Off	“Default watermark saved. It is currently turned off.”
On + Logo, no logo	“Upload a watermark image (e.g. your logo), or switch to a text watermark.”
On + Text, empty text	“Enter the watermark text.”

2.3 Notices on the page

- Account with its own watermark Off while the default is On: “You haven't turned on a watermark of your own, so the **MW Realty default watermark** is added to your listing photos. Set up yours below to use it instead.”
- Agency's agent: “Your listings belong to **<Agency>**, so their watermark is used on your photos. Only the agency can change it.” All controls are disabled; no Save button.
- Super Admin accounts tab: “An account's own watermark always wins. Accounts with none, or with theirs turned off, get your default watermark. Agents in an agency use the agency's.”

3. Who can do what

Action	Super Admin	Agency	Agent
Open Listing Settings	**Yes**	**Paid plan with Listing settings**	**Plan with Listing settings (own, or agency's if covered)**
Edit own watermark	**Default watermark**	**Yes**	**Independent only; agency agent read-only**
See every account's watermark	**Agency & agent watermarks tab**	**No**	**No**

Action	Super Admin	Agency	Agent
KYC pending	n/a	**Locked: "Your account is pending Super Admin approval."**	**Same**
Plan without the feature	n/a	**Unlock listing settings card**	**Card (says "Ask your agency to upgrade" for agency agents)**

4. Fields and validation

Field	Required	Rules / limits
Watermark On/Off	No	Off = no own watermark (default may apply).
Type	Yes	Logo or Text.
Logo	When On + Logo	PNG, JPG/JPEG or WebP image; max 4 MB. Buttons **Upload** / **Replace** / **Remove**.
Text	When On + Text	Max 60 characters (spaces only counts as empty).
Colour	No	Hex colour #rrggbb; default white.
Opacity	Yes	5–100 (%).
Size	Yes	5–80 (% of photo width).
Position	Yes	One of the 9 grid positions.

5. Test scenarios

Priority: **High** core flow / data loss / access · **Medium** · **Low** cosmetic. Needs: Agency on a plan that includes Listing settings, an Agency on Free plan, an agent of the paid agency, an independent agent, Super Admin, a test listing per account, and a few test photos (one landscape, one portrait).

	Scenario	Steps	Expected result
LS-01	**Open page (paid agency)** High	1. Sign in as Agency with the feature; click **Listing Settings**.	Heading “Listing Settings”, subtitle “How your listing photos are branded when you upload them.”, tab **Watermark**, settings panel and Preview.
LS-02	**Text watermark** High	1. Switch On, Type **Text**, text “QA TEST”, colour white, Bottom right, Opacity 60, Size 30. 2. **Save changes**.	Toast “Watermark saved. It will be added to every listing photo you upload from now on.” Badge shows On. Settings remain after reload.
LS-03	**Effect on new photos** High	1. Edit a test listing, upload 2 new photos, save. 2. Open them in the CRM gallery and on the public property page.	“QA TEST” visible bottom-right on both, about 30% of photo width, semi-transparent, small margin from edges — matching the Preview.
LS-04	**Existing photos unchanged** High	1. Check photos uploaded before LS-02.	No watermark added to older photos.
LS-05	**Logo watermark** High	1. Type **Logo**, click **Upload**, choose a transparent PNG. 2. Centre, Opacity 30, Size 25; save; upload a photo to a listing.	Logo appears in the logo box and Preview before saving. After save the logo still shows on reload. New photo has the logo in the centre, faded; transparent parts stay transparent.
LS-06	**Logo required** Medium	1. On, Type Logo, no logo (or click **Remove**); save.	Red text under Logo: “Upload a watermark image (e.g. your logo), or switch to a text watermark.” The previously stored logo is kept.
LS-07	**Text required** Medium	1. On, Type Text, text empty or only spaces; save.	“Enter the watermark text.” under the text box. Nothing saved.
LS-08	**Logo file rules** Medium	1. Upload a 5 MB PNG; save. 2. Upload a GIF or PDF (choose “All files”); save.	Save refused; red error under Logo (file too large / must be a file of type png, jpg, jpeg, webp). Stored logo unchanged.
LS-09	**Text length** Low	1. Type more than 60 characters.	Input stops at 60 characters.
LS-10	**All 9 positions** Medium	1. Click each grid square; watch the Preview and the label under the grid. 2. Save one corner and one middle position; upload a photo each time.	Label changes (Top left … Bottom right); Preview moves; uploaded photos match.
LS-11	**Opacity and size limits** Medium	1. Drag Opacity to 5 and 100, Size to 5 and 80; save each; upload a photo.	Sliders stop at those limits; % values shown; photos show barely visible vs solid, tiny vs very large watermark.

	Scenario	Steps	Expected result
LS-12	**Portrait photo** Low	1. Upload a tall portrait photo with Bottom centre.	Watermark inside the image, not cut off; size relative to photo width.
LS-13	**Colour** Low	1. Pick red swatch, then a custom colour; save; upload.	Text colour in Preview and photo matches.
LS-14	**Cancel** Low	1. Change several settings; click **Cancel**.	Form returns to the last saved settings (including logo).
LS-15	**Turn off** High	1. Switch Off; save. (Super Admin default is On.) 2. Upload a photo.	Toast “Watermark settings saved. Yours is off, so the MW Realty default watermark (if any) is used.” Notice about the MW Realty default appears. Preview overlay says off. New photo has the **default** watermark (or none if the default is off).
LS-16	**Agency agent read-only** High	1. Sign in as the paid agency's agent; open Listing Settings. 2. Upload a photo to an agency listing.	Notice “Your listings belong to <Agency>…”. Controls greyed out; no Upload / Save. Photo gets the agency's watermark.
LS-17	**Independent agent** Medium	1. Independent agent on a plan with the feature sets a text watermark; uploads a photo.	Works as for the agency; own watermark on own listing photos.
LS-18	**Plan lock** High	1. Sign in as Agency on Free plan. 2. Check sidebar; open `/crm/listing-settings`.	Padlock “Upgrade your plan to unlock this”. Page shows **Unlock listing settings** card, text “Listing settings aren't included in your <plan> plan.” and **View Plans**.
LS-19	**Free plan photos** Medium	1. As the Free agency upload a listing photo.	Photo gets Super Admin's default watermark if it is on (own watermark is never used without the plan feature).
LS-20	**Downgrade effect** Medium	1. Agency with own watermark On moves to a plan without the feature (test environment only). 2. Upload a photo.	Page locked; new photos get the default watermark, not the agency's.
LS-21	**KYC-pending** High	1. Not-approved account opens Listing Settings.	Padlock “Unlocks after KYC approval”; page shows “Your account is pending Super Admin approval.”
LS-22	**Super Admin default** High	1. Open CRM from Admin › Listing Settings. 2. Set a logo default, On; save. 3. Upload a photo to an MW Realty listing and to a Free agency's listing.	Subtitle about the default; tabs **Default watermark** / **Agency & agent watermarks**. Toast “Default watermark saved. It goes on your listings…”. Both photos get the default.
LS-23	**Default off** Medium	1. Super Admin turns the default Off; save. 2. Account without own watermark uploads a photo.	“Default watermark saved. It is currently turned off.” Photo has no watermark.

	Scenario	Steps	Expected result
LS-24	**Accounts list** Medium	1. Super Admin opens **Agency & agent watermarks**. 2. Search an agency name / email; filter On / Off; page 2.	Count on tab = accounts with own watermark On. Rows show account name, kind (Agency / Agency agent / Independent agent) and email, logo thumbnail or coloured text, position, “opacity% · size%”, **On** or **Off · default**, updated time. 20 per page. No match: “No accounts match.”
LS-25	**Accounts empty** Low	1. On a fresh test site with no account watermarks open the tab.	“No agency or agent has set up their own watermark yet — all use the default.”
LS-26	**Private logo** Medium	1. Sign out; try to open the logo image link copied from the page.	Not shown without sign-in; logos are not public files.
LS-27	**Mobile width** Low	1. Open page at ~375 px.	Settings and Preview stack; Preview recalculates watermark position on resize.

6. Expected results checklist

- [ ] Own watermark (when On, complete and plan allows) beats the default; otherwise the default applies; otherwise none.
- [ ] Agency agents always get the agency's watermark and cannot edit it.
- [ ] Only photos uploaded after saving are watermarked; old photos unchanged.
- [ ] Preview position, size and opacity match the real stamped photo.
- [ ] Validation messages for missing logo / text appear and nothing is lost.
- [ ] Plan and KYC locks work; Super Admin sees default + accounts tabs.

7. Known behaviour (not bugs)

By design:

- Changing or turning off a watermark does not remove it from photos already uploaded. To get clean photos, re-upload the originals.
- A PNG with transparency is placed on a white background when saved as a listing photo.
- In Super Admin's accounts list “On” means the account switched it on; if that account's plan no longer includes Listing settings, its photos still get the default.
- The Preview uses a fixed sample photo; the real result scales with each photo's own width.

Test-data cautions: watermarks are burned into photo files and cannot be undone. Test only on test listings with test photos. Do not change Super Admin's default watermark on a live site unless told to — it affects all accounts' new uploads.

8. Reporting a bug

Include: role, account, plan, the saved settings (type, position, opacity, size), listing reference, the original photo and the watermarked result, expected vs actual, time, screenshot. Use test data only.
