MW REALTY CRM · TESTER HANDBOOK · MODULE 23

Plans

Choosing, paying for and changing a subscription plan, coupons, payment history and invoices

Where: Account menu (avatar, top right) › **Plans** (`/crm/plans`), the **Upgrade Plan** button in the top bar, **Checkout** (`/crm/plans/checkout`), **Payment History** (`/crm/plans/payments`) and **Invoice** (`/crm/plans/payments/<id>/invoice`). **Who:** Agency and Agent accounts only. An agent who belongs to an agency sees the agency's plan and has nothing to buy. Super Admin has no Plans screen in the CRM. **Locks:** the Plans page and checkout are locked until KYC approval (“Unlocks after KYC approval”); Payment History and invoices stay available.

Payments: test only on the **test / staging** site with Stripe in **test mode**. Use only Stripe test cards (for example `4242 4242 4242 4242`). Never enter a real card. If the site looks like the live site, stop and ask.

1. What this module does

Every Agency and Agent account is on a plan. The plan decides how many listings the account can add, how many Premium listings and website ads it gets, how many team agents an agency can have, and which extra CRM sections are open (Reports, Lead Insights, Property insights, Listing Settings, Integrations). On this module the account sees its current plan and usage, compares all plans, applies a coupon, pays for a plan by card (Stripe), upgrades, downgrades, turns auto-renew off or on, and looks at past payments and invoices.

Plans page

Summary bar (current plan, status badge, listing usage, renewal date, **Payment history**, auto-renew buttons), optional credits strip, **Monthly / Yearly** toggle, coupon box, and one card per plan with price, features and an action button.

Change-plan window

Opens for accounts that already pay by card. Shows **Current → New**, “Charged today”, the price lines and the dates, then **Pay AED … & upgrade**, **Schedule downgrade** or **Yes, stop auto-renew**.

Checkout

First card payment. Left: card preview and **Your order** (price, coupon, **Total due today**, renewal line). Right: **Payment details** (Cardholder name, Card number, Expiry date, CVC) and the **Pay AED …** button.

Payment History and Invoice

Last 12 months grouped by month, four totals (Paid in 12 months, Payments, Saved with coupons, Last payment), Paid / Failed tag, **Invoice** and PDF buttons. The invoice page has **Print** and **Download PDF**.

2. How it works (business rules)

2.1 Two payment modes

The site runs in one of two modes. Ask the team lead which one your test site uses. The note at the bottom of the Plans page tells you:

- **Online payments on (Stripe):** note “Payments are processed securely by Stripe — MW Realty never sees your card details.” A first paid plan is bought on the Checkout page. An existing card subscription is changed in the change-plan window.

- **Online payments off:** note “Plan changes are reviewed by MW Realty and applied to your account — no payment is taken on this page.” The summary bar says “Upgrades are activated by our team after a quick review.” Choosing a plan creates a **request** that Super Admin approves or rejects in Admin › Portal accounts › **Plan Upgrade Requests**.

Even with Stripe on, a plan that cannot be sold online (for example a plan with a one-time billing cycle) still goes through the request flow.

2.2 What the plan card button does

Button on the card	When it shows	What happens
Current Plan (disabled)	The account is already on this plan and interval.	Nothing. Card also has the ribbon **Your Plan**.
Subscribe & Pay	Stripe on, the account has no card subscription yet, no pending request.	Opens Checkout for this plan and interval (and coupon, if applied and valid for it).
Upgrade / **Downgrade** / **Switch to <plan>**	Stripe on and the account already has a card subscription.	Opens the change-plan window with Stripe's price preview. “Switch to …” is shown for a free plan (means stop renewing).
Starts dd Mon (disabled)	A downgrade to this plan is booked for the next renewal, or auto-renew is off (on the free plan card).	Nothing. Shows the date the plan starts.
Upgrade Now / **Switch Plan**	Request flow (Stripe off, or plan not sold online). “Switch Plan” when the plan is cheaper than the current one.	Creates a request for Super Admin. Message: “Upgrade request submitted — Super Admin will review it shortly.” (with “with coupon CODE” if a coupon was used).
Request Pending (disabled)	This plan has a pending request.	Nothing. Summary bar shows “<plan> pending review”.
Upgrade (disabled, grey)	Another plan has a pending request.	Nothing. Tooltip “You already have a pending request”.

2.3 Upgrade, downgrade, cancel (card subscriptions)

Pick plan → Change window (Stripe preview) → Confirm → Success message + page reloads

- **Upgrade** = a higher monthly price, or the same plan from Monthly to Yearly. Charged **today** to the saved card: the new price minus a credit for unused time on the current plan. A new billing period starts today. The plan changes only if the charge succeeds. Message: “Your plan is now <plan> (<interval>). The amount shown was charged to your card.”
- **Downgrade** = a lower price, or Yearly to Monthly. Nothing is charged or refunded. The account keeps the current plan until the renewal date, then the new plan starts. Message: “Done — you keep <current> until dd Mon yyyy, then <new> (<interval>) starts. Nothing is charged today.” The summary bar then shows the scheduled plan and a **Keep <current plan>** button to undo it (“Scheduled change cancelled — you stay on <plan>.”).
- **Move to a free plan** = stop auto-renew. The paid plan stays until the end of the paid period, then the account drops to the free plan. Message: “Your subscription will end on dd Mon yyyy and your account moves to the <Free plan> plan then.”
- **Cancel auto-renew** (summary bar) asks “Turn off auto-renew?” and then shows “Auto-renew is off. You keep your plan until dd Mon yyyy.” The bar then reads “Auto-renew off — ends …, then Free” and offers **Resume auto-renew** (“Auto-renew is back on.”).
- When the subscription finally ends, the account is moved to the default free plan.

2.4 Coupons

- Coupons are created by Super Admin in Admin › Coupons. A coupon is a percentage or a fixed AED amount, for the first payment only, for N months, or for every payment. It can be limited to some plans, to a start / end date, to a total number of uses and to a number of uses per account.
- On the Plans page the tester types a code and clicks **Apply**. Each paid plan card then shows the discounted price with the old price crossed out and a line “CODE: 10% off on the first payment — save AED …”, or the reason it does not apply to that plan.
- Coupons never apply to free plans. The coupon box is hidden while a plan request is pending.
- For the request flow, the coupon is checked again when Super Admin approves. If it is no longer valid, approval is refused and the admin must reject the request.

2.5 Limits and what a plan unlocks across the CRM

Plan setting (feature line on the card)	Effect in the CRM
“N listings / month” or “Unlimited listings”	Properties + Commercial combined. On a **paid** plan it is N **new** listings per calendar month (deleting one does not give the slot back; unused slots do not carry over). On the **free** plan it is the number of listings held at once. When used up, a new listing is refused unless it is paid with credits (if credits are on).
“N premium listings / month (max D days)”	How many listings can be made Premium (module Premium).
“N website banner ads / month”, “Ads run up to …”	Opens Advertisements. Without it the menu item shows “Upgrade your plan to advertise on the website”.
“Add up to N team agents” / “Unlimited team agents”	Agency's Agents module. Over the limit: “Your plan allows up to N team agents. Upgrade your plan to add more.” With none: “Team agent accounts are not included in your plan. Upgrade to add agents.”
“Leads reports & analytics”	Opens Reports (else “Upgrade your plan to unlock reports”).
Lead insights, Property insights, Listing settings (watermark), Facebook Lead Ads integration, Property Finder integration	Open the matching sections. Without them the menu item has a padlock “Upgrade your plan to unlock this” and the page shows an “Unlock …” card with **View Plans**.

Features shown with a cross on a plan card are not included in that plan. The card lines are built from the same settings the CRM enforces, so the card and the real access must always agree.

2.6 Automatic behaviour

- **Renewal reminder:** every morning at 09:00 (UAE time) accounts whose card subscription renews **tomorrow** get one email (“Your <plan> plan renews tomorrow — MW Realty”) and one bell notification (“Your plan renews tomorrow”). Not sent if auto-renew is off. Sent only once per renewal date. If a downgrade is booked, the reminder shows the new plan and price.
- **Renewals and payments:** each paid card invoice (first payment, upgrade, renewal) becomes a row in Payment History and an invoice email with the PDF attached is sent. A failed renewal appears as **Failed** and the status badge shows “Payment failed — retrying” with “— update your card to keep your plan.”
- **Stripe confirmation:** Stripe also confirms payments in the background. If the checkout page closes early, the plan is still activated a few seconds later.
- **Top-bar “Upgrade Plan” button:** shown to accounts that can still upgrade (not on the top plan, not an agency's agent). Before KYC approval it is greyed with a padlock.

3. Who can do what

Action	Super Admin	Agency	Agent (independent)	Agent in an agency	KYC pending
See **Plans** in the account menu	No	Yes	Yes	Yes	Yes, with padlock
Open the Plans page and compare plans	No (403)	Yes	Yes	Agency plan card only	No
Apply a coupon / choose / pay for a plan	No	Yes	Yes	No — nothing to buy	No
Cancel / resume auto-renew	No	Yes	Yes	No	Only if already subscribed
Payment History and invoices	No (Admin › Payments instead)	Own	Own	Own past payments	Yes
Create plans, coupons; approve requests	Yes (Admin)	No	No	No	—

“Agent in an agency” = an agent connected to an agency through My Agency / Agents whose agency plan includes team agents. Their listings count against the agency's plan, and plan-locked sections follow the agency's plan (“Ask your agency to upgrade.”). An agent who only typed a brokerage name in their profile stays on their own plan. Before any of this, the account must also pass the 2FA requirement if one applies (see the Security guide).

4. Fields and validation

Field	Required	Rules / messages
Coupon code (Plans page)	For Apply	Max 40 characters, shown in capitals. Empty code: Apply does nothing. Messages: “This coupon code is not valid.”, “This coupon is not active yet.”, “This coupon has expired.”, “Coupons apply to paid plans only.”, “This coupon cannot be used with the <plan> plan.”, “This coupon has reached its usage limit.”, “You've already used this coupon.” Max 20 checks per minute.
Billing period	—	Monthly or Yearly. A plan without a yearly price shows “Monthly billing only” under Yearly and is sold monthly.
Cardholder name (Checkout)	Yes	Pre-filled with the account name. Max 60. Empty: “Enter the name shown on the card.”
Card number / Expiry date / CVC	Yes	Stripe card fields. Empty: “Enter your card number.”, “Enter the expiry date.”, “Enter the CVC.” Wrong values: Stripe's own message under the field. Any error also shows “Please check the highlighted fields.” at the top.

5. Test scenarios

Priority: **High** core flow / money / access · **Medium** · **Low** cosmetic. Prepare: one Agency and one independent Agent (both KYC approved, on the free plan), one KYC-pending account, one agent inside an agency, and at least one coupon from Admin › Coupons. “Stripe on” rows need a test-mode site.

	Scenario	Steps	Expected result
PL-01	**Open Plans** **High**	1. Sign in as approved Agency. 2. Avatar menu › **Plans**.	Summary bar shows the plan name, listing usage (“X / N listings”, “this month” on paid plans, or “· unlimited”). All active plans are shown in admin order. Current plan has **Your Plan** ribbon and disabled **Current Plan** button. The popular plan has **Most Popular**.
PL-02	**Feature lines match the plan** **High**	1. Note the features on the current plan card (ticks and crosses). 2. Open each related module (Reports, Lead Insights, Listing Settings, Integrations, Advertisements).	Ticked = open. Crossed = padlock in the menu with “Upgrade your plan to unlock this” (or the Reports / Ads text) and an “Unlock …” card on the page.
PL-03	**Monthly / Yearly toggle** **Medium**	1. Click **Yearly**.	Prices change to “/ year” with “≈ AED …/month · save X%”. The toggle shows “Save up to X%”. Plans without a yearly price show the monthly price and “Monthly billing only”. Free plan shows “Free forever”. Toggle is hidden if no plan has a yearly price.
PL-04	**Valid coupon** **High**	1. Type a valid code in lower case, click **Apply**.	Code turns to capitals and becomes read-only. “Coupon CODE applied. It's used on the plan you choose below.” Each eligible card shows the new price, crossed old price and “CODE: … — save AED …”. Discount never exceeds the price.
PL-05	**Coupon errors** **High**	1. Apply an unknown code, then an expired, a not-yet-started, a used-up, and an already-used-by-me code.	Red line with the matching message from section 4. No price changes.
PL-06	**Coupon limited to one plan** **Medium**	1. Apply a coupon set for plan A only.	Plan A shows the discount. Other paid plans show “This coupon cannot be used with the <plan> plan.”
PL-07	**Remove coupon** **Low**	1. After PL-04 click **Remove**.	Field cleared and editable; normal prices return; hint “Have a coupon? Apply it to see discounted prices.”
PL-08	**Request flow: submit** **High**	1. Stripe off. Click **Upgrade Now** on a paid plan (with a coupon applied).	“Upgrade request submitted with coupon CODE — Super Admin will review it shortly.” Bar shows “<plan> pending review”. That card shows **Request Pending**; other cards show a disabled **Upgrade**; coupon box hidden. Super Admin gets a bell notification.

	Scenario	Steps	Expected result
PL-09	**Request flow: approve / reject** High	1. As Super Admin open Admin › Portal accounts › **Plan Upgrade Requests**, approve the request. 2. Repeat with a new request and reject it.	Approve: the account's Plans page shows the new plan as current; new sections unlock after reload. Reject: pending state disappears and the account can request again.
PL-10	**Request with coupon that became invalid** Medium	1. Submit a request with a coupon. 2. In Admin, expire the coupon, then approve.	Approval refused: “Coupon CODE can no longer be applied: This coupon has expired. Reject this request so the account can resubmit without it.” Plan unchanged.
PL-11	**Second request blocked** Medium	1. With a pending request, try to choose another plan.	Buttons disabled. If forced, message “You already have a pending plan request.”
PL-12	**Checkout opens** High	1. Stripe on, free-plan account. Click **Subscribe & Pay** on a paid plan.	Checkout shows steps Choose plan ✓ Review ✓ Payment. **Your order**: “<plan> plan, Billed monthly · renews automatically”, up to 3 highlights, **Total due today**, “Then AED … every month from dd Mon yyyy. Cancel auto-renew any time.” Name is pre-filled.
PL-13	**Checkout with coupon** High	1. Apply a “first payment only” coupon, then **Subscribe & Pay**. 2. Repeat with a repeating / forever coupon.	Coupon line “−AED …” and lower total. First-payment coupon: the “Then AED …” line shows the full price. Repeating / forever coupon: it shows the discounted price.
PL-14	**Checkout field validation** High	1. Clear the name and leave card fields empty. Click **Pay**. 2. Type an incomplete card number or a past expiry date.	“Please check the highlighted fields.” plus the per-field messages. Fields outlined red, card preview shakes. No charge.
PL-15	**Successful payment (test card)** High	1. Card `4242 4242 4242 4242` , any future date, any CVC. Click **Pay AED …**.	“Processing payment…”, then “Paid AED …” and “Visa •••• 4242 · welcome to the <plan> plan.” (may add “Your plan is being activated — this takes a few seconds.”). **Go to my plan** shows the new plan with badge **Active** and a renewal date. A row appears in Payment History; an invoice email arrives.
PL-16	**Declined card, then retry** High	1. Pay with Stripe test card `4000 0000 0000 0002` . 2. Change to `4242 4242 4242 4242` and pay again.	Step 1: red alert with Stripe's decline text; plan unchanged. Step 2: payment succeeds once; only one subscription and one paid row.
PL-17	**Card needing authentication** Medium	1. Pay with Stripe test card `4000 0025 0000 3155` ; complete, then (new try) fail the test authentication popup.	Complete: paid as PL-15. Fail: error shown, no plan change.

	Scenario	Steps	Expected result
PL-18	**Checkout not allowed** Medium	1. While subscribed, open `/crm/plans/checkout?plan_id=<id>` directly. 2. Open it with a free plan id, or with no plan id.	1: “You already have a subscription — change plans from the Plans page.” with **Back to Plans**. 2: an error (not found / “The plan id field is required.”); no card form.
PL-19	**Upgrade with preview** High	1. Subscribed account. Click **Upgrade** on a higher plan. 2. Read the window, click **Pay AED … & upgrade**.	Window shows “Calculating with Stripe…”, then “Upgrade to <plan>”, **Charged today** amount, lines incl. “Credit for unused time on <old plan>”, timeline “Today — new billing period starts” and next payment. After confirm: “Your plan is now … The amount shown was charged to your card.” New paid row in history.
PL-20	**Monthly → Yearly same plan** Medium	1. Switch toggle to Yearly; click **Upgrade** on the current plan.	Treated as an upgrade (charged today). Yearly → Monthly is treated as a downgrade.
PL-21	**Downgrade and undo** High	1. Click **Downgrade** on a cheaper paid plan, then **Schedule downgrade**. 2. Click **Keep <plan>** in the bar.	1: Charged today AED 0.00; “Done — you keep … until …, then … starts. Nothing is charged today.” Bar shows the scheduled plan and date; that card shows **Starts dd Mon**. Current features stay until then. 2: “Scheduled change cancelled — you stay on <plan>.”
PL-22	**Switch to the free plan** High	1. Click **Switch to <Free>**, then **Yes, stop auto-renew**.	Window: “Move to <Free>”, no refund. Message “Your subscription will end on … and your account moves to the … plan then.” Bar: “Auto-renew off — ends …, then Free”. Paid features remain until that date.
PL-23	**Cancel / resume auto-renew** High	1. Click **Cancel auto-renew**, confirm **Turn off**. 2. Click **Resume auto-renew**.	1: “Auto-renew is off. You keep your plan until dd Mon yyyy.” 2: “Auto-renew is back on.” and the bar shows “Renews … · AED …” again.
PL-24	**Change window: Not now** Low	1. Open any change window and click **Not now** or ×.	Window closes. Nothing changes; no charge.
PL-25	**Listing limit after plan change** High	1. On a plan with N listings / month add N listings. 2. Try one more. 3. Upgrade, try again.	2: the add is refused with a limit message (or offered as a credit-paid extra listing if credits are on). Bar meter is full. 3: allowed; usage shows the new limit.
PL-26	**Agency team-agent limit** Medium	1. Agency on a plan without team agents: add an agent in Agents. 2. Upgrade to a plan with “Add up to N team agents”, add N+1.	1: “Team agent accounts are not included in your plan. Upgrade to add agents.” 2: the (N+1)th is refused with “Your plan allows up to N team agents. Upgrade your plan to add more.”

	Scenario	Steps	Expected result
PL-27	**Agent inside an agency** High	1. Sign in as an agent of an agency whose plan includes team agents. Open Plans.	Only “Your Plan” card: “Covered by your agency”, agency plan name, “Agency listings” usage, the agency's feature list and text “there's nothing for you to buy or upgrade”. No plan cards, no coupon, no **Upgrade Plan** top button. Locked sections say “Ask your agency to upgrade.”
PL-28	**KYC pending** High	1. Sign in as a KYC-pending account. Open the avatar menu. 2. Click **Plans** (or open `/crm/plans`). 3. Open `/crm/plans/payments`.	1: Plans has a padlock with tooltip “Unlocks after KYC approval”; top **Upgrade Plan** is greyed with a padlock. 2: no plan cards; message “Your account is pending Super Admin approval.” with **Try again**. 3: Payment History opens (empty state if no payments). My Profile and Security stay open.
PL-29	**Super Admin** Medium	1. Open the CRM from Admin. Open the avatar menu. 2. Open `/crm/plans` directly.	1: no Plans item (only Logout / Back to Admin). 2: error “Plans belong to agent and company accounts.”
PL-30	**Payment History** High	1. Click **Payment history** on the Plans page.	Payments of the last 12 months, newest first, grouped by month. Totals match the rows. Each row: date, “<plan> plan”, cycle, method (“Card payment” or “Recorded by MW Realty”), coupon “−AED …”, amount (old amount crossed if discounted), **Paid** or **Failed** (hover shows the reason). Button hidden if there are no payments.
PL-31	**Empty Payment History** Low	1. Account with no payments: open `/crm/plans/payments`.	“No payments in the last 12 months” and **View plans** link. Totals 0.00 and “—”.
PL-32	**Invoice view, print, PDF** High	1. Click **Invoice** on a row. 2. Click **Print**, then **Download PDF**. Also try the PDF icon on the history row.	Invoice number, account, plan, amount, discount match the row. Print opens the browser print dialog. PDF downloads with the invoice number as file name and the same content.
PL-33	**Other account's invoice** High	1. Change the id in `/crm/plans/payments/<id>/invoice` to another account's payment id.	Not found error. No other account's data is shown.
PL-34	**Renewal reminder** Medium	1. Ask a developer to set a test subscription to renew tomorrow and run the reminder job (or wait for 09:00 UAE). 2. Run it again.	One email “Your <plan> plan renews tomorrow — MW Realty” and one bell notification “<plan> auto-renews on dd Mon yyyy for AED …”. Second run sends nothing. With auto-renew off nothing is sent.
PL-35	**Failed renewal display** Medium	1. With developer help, make a test renewal fail (Stripe test clock / declining test card).	Badge “Payment failed — retrying”, bar text “— update your card to keep your plan.”, Failed row in history. When Stripe retries successfully the row turns Paid.

	Scenario	Steps	Expected result
PL-36	**Top-bar Upgrade Plan button** Low	1. Check the button on a free plan, then on the highest plan.	Free: **Upgrade Plan** opens Plans. Highest plan: button hidden.
PL-37	**Old portal links** Low	1. Open `/portal/plans` and `/portal/plans/payments`.	Redirect to `/crm/plans` and `/crm/plans/payments`.
PL-38	**Mobile width** Low	1. At about 375 px width open Plans, Checkout, Payment History, Invoice.	Cards stack, buttons reachable, card fields usable, no sideways scrolling of the page.

6. Expected results checklist

- [ ] Plan cards list every active plan; ticks/crosses match real access in the CRM.
- [ ] Coupon results show the right discount or the right error for each plan.
- [ ] Request flow: one pending request at a time; approve changes the plan; reject frees the account.
- [ ] Checkout shows the price and total before payment; test card 4242 succeeds, decline card fails with no plan change.
- [ ] Upgrade charges today and switches at once; downgrade and cancel charge nothing and take effect at renewal.
- [ ] Keep / Resume undo scheduled changes.
- [ ] Payment History totals match the rows; invoices open, print and download; other accounts' invoices are not reachable.
- [ ] Agency agents see the agency plan only; KYC-pending accounts cannot open Plans but can open Payment History; Super Admin has no Plans screen.
- [ ] Renewal reminder is sent once, the day before, only when auto-renew is on.

7. Known behaviour (not bugs)

Note:

- On a paid plan the listing limit is per calendar month: deleting a listing does not free a slot. On the free plan it counts listings held at once.
- A downgrade or move to free gives no refund; the current plan stays until the renewal date. Payment History does not show a row for a downgrade.
- The upgrade charge is calculated by Stripe at the moment of confirming, a few seconds after the preview, so it can differ from the preview by a very small amount.
- Under **Yearly** , a plan without a yearly price still shows and sells the monthly price.
- Payment History shows only the last 12 months.
- There is no “update card” button on the Plans page; a failed card is retried by Stripe.
- An agent who joins an agency (with team agents in its plan) moves to the agency plan; if they had their own card subscription it is set not to renew and the page shows “Your own subscription won't renew — it ends on …”.
- The top bar **Upgrade Plan** button is hidden on the highest plan.

> **Test-data cautions:** Stripe test mode and Stripe test cards only — never a real card or the live site. Use test email addresses you control (invoice and reminder emails are really sent). Do not change or delete plans or coupons in Admin that other testers use; create your own test coupon. Do not run background jobs yourself unless a developer tells you how.

8. Reporting a bug

Include: module (Plans / Checkout / Payment History / Invoice), role and account email, KYC state, current plan and interval, payment mode (Stripe on/off), coupon code used, payment or invoice ID, the Stripe test card used, steps, expected vs actual, exact message text, time, and a screenshot. Never include full card numbers other than Stripe test cards. Use test data only.
