MW REALTY · TESTER HANDBOOK · PROJECT DOCUMENT P5

Business Rules & Expected Results

Where to find the business rules and the expected application behaviour for every module, and how they are written.

Scope: All modules of the website, Admin and CRM. The rules and expected results themselves live in the module test guides (00–26); this page is the index to them. About 900 test scenarios exist across the guides.

1. How each module guide is organised

Every module guide (01–26) follows the same eight sections, so a tester always knows where to look.

Section	What it holds	Use it for
1. What this module does	Purpose, screens and their URLs	Understanding the module before testing
1. How it works (business rules)	Statuses, calculations, limits, automatic jobs, notifications	The business rules to verify
1. Who can do what	Action × role table (Super Admin, Agency, Agent)	Role and permission tests
1. Fields and validation	Inputs, limits, exact validation messages	Negative and boundary tests
1. Test scenarios	ID, scenario, priority, steps, expected result	Test case execution
1. Expected results checklist	Short list of what must hold true	Sign-off and regression
1. Known behaviour (not bugs)	Behaviour by design, test data cautions	Avoiding false bug reports
1. Reporting a bug	What to include in a bug report	Bug reports

Priority in section 5: **High** = core flow, data loss or access; **Medium** = important but with a workaround; **Low** = cosmetic.

2. Index by module

No.	Module	Scenario IDs	Scenarios	Key business rules (section 2 of the guide)
00	Project overview	—	—	User types, website pages, how leads reach agencies, listing visibility rules
01	Dashboard	DB-xx	32	What each KPI card, chart and alert counts, for which account; won / lost / win rate; trend badges
02	Leads	LD-xx	58	Lead sources, duplicates, assignment and round robin, notifications, status / stage / closing, import
03	Lead Insights	LI-xx	26	How a lead gets website activity, ranking, the Insights tab on a lead

No.	Module	Scenario IDs	Scenarios	Key business rules (section 2 of the guide)
04	Website Leads	WL-xx	41	How a visitor becomes a website lead, automatic routing from the Lead Pool, manual transfer
05	Master Data	MD-xx	31	Lead stages, tags and sources (shared and own), unique names, deleting, Property Options
06	Integrations	IN-xx	38	Facebook Lead Ads, Property Finder import with Super Admin review, hub status chips
07	Properties	PR-xx	52	Permit status, which permit is needed, Active switch and visibility, plan limits and credits, quality score
08	Commercial	CM-xx	26	Same rules as Properties for commercial types; separate list and website page
09	Listing Permits	LP-xx	28	Permit statuses, approval modes A/B, take down, expiry job
10	Premium	PR-xx (Premium)	35	Booking, scheduling, editing and stopping Premium placement, paid from the plan or credits
11	Advertisements	AD-xx	35	Banner ad booking, review by MW Realty, placements and pricing, impressions / clicks report
12	Sold Listings	SL-xx	27	Marking sold / rented with proof documents, the register, putting a listing back on the market
13	Marketing Properties	MK-xx	19	Super Admin hand-picked list behind the home page section and /marketing-properties
14	Agents	AG-xx	45	How agents join, membership statuses, agent slots, lead eligibility, suspend / remove / leave
15	Nearby Places	NP-xx	27	Landmarks listings are tagged with and how they show on the property page
16	Listing Settings	LS-xx	27	Photo watermark: which one applies, position, size, opacity, plan lock
17	Reports	RP-xx	42	Leads, Properties, Sales and Agents reports: date range, scope, won / lost, export, plan lock
18	Help Desk	—	—	In-app quick guides for each screen; short guide only, detailed scenarios to be added
19	Contact Us (support tickets)	CU-xx	31	Support tickets: statuses, transitions, badge and sorting, notifications, Admin side
20	Credits	CR-xx	40	Credit balance, history, calculator, buying by card, spending on listings, Premium and ads
21	My Profile	PF-xx	38	Account details, public page, KYC documents and approval, login email change, document expiry emails
22	Security	SEC-xx	40	Two-factor authentication, new-device email check, recovery codes, recognised devices
23	Plans	PL-xx	38	Payment modes, upgrade / downgrade / cancel, coupons, limits and what a plan unlocks, automatic behaviour

No.	Module	Scenario IDs	Scenarios	Key business rules (section 2 of the guide)
24	Listing Review	LR-xx	25	Duplicate and risk screening, approve / reject, holds
25	Property Import & AI Copy	PI-xx, AC-xx	30	Excel import rules, duplicates, Write with AI
26	Compare, Insights & AI Chat	CP-, IN-, CU-, CH-, OT-xx	35	Compare limits and fees, market insight formulas, currency sync, chat languages

> Scenario counts for guides 01–23 are taken from the published PDFs and may be off by one or two where a table spans pages.

3. Cross-module business rules

These rules affect several modules. Test them end to end, not only inside one module.

Rule	Modules involved	Expected result
A listing is on the website only when it is Active, its permit status allows it (Module 09) and it is not held by Listing Review (Module 24)	07, 08, 09, 24, website	Hidden listings do not appear in search, Premium, Marketing or compare
Every website enquiry, viewing request, property request and chat contact becomes a lead for the listing's owner or the profile owner	Website, 02, 04, 26	Lead appears in the right account with its source
Plan features lock modules and limits (listings, Premium quota, integrations)	06, 07, 10, 11, 23, 25	Locked modules show the plan card; limits refuse with a message
Credits pay for Premium and ads when the plan quota is used up	10, 11, 20	Balance falls by the stated amount; history records it
Agency agents work with the agency's plan and credits; independent agents have their own	14, 20, 23	Agent sees only own and assigned records
Super Admin sees all accounts and the admin-only modules (04, 09, 13, 24, options, ad review)	All CRM modules	Agencies and agents are refused (403) on those pages
Prices are stored in AED; the currency switcher only converts the display	Website, 26	Converted prices follow Admin rates
Times and daily jobs use UAE time (Asia/Dubai)	02, 09, 11, 23	Reminders and expiry run on the UAE date

4. Writing new expected results

When a module changes, update its guide in the same structure: add the rule to section 2, the role change to section 3, the message to section 4, and at least one scenario to section 5 with a quoted expected result (exact toast, message or status label).
