MW REALTY CRM · TESTER HANDBOOK · MODULE 06

# Integrations

Facebook Lead Ads (leads from Facebook / Instagram lead forms) and Property Finder (listing import with Super Admin review)

**Where:** CRM sidebar › Leads › Integrations ( `/crm/integrations` ), Facebook ( `/crm/integrations/facebook` ), Property Finder ( `/crm/integrations/property-finder` ) and its review queue ( `/crm/integrations/property-finder/review` ). **Who:** Super Admin, Agency, Agent. **Locks:** KYC pending → padlock "Unlocks after KYC approval". Plan without Facebook Lead Ads *and* without Property Finder → padlock "Upgrade your plan to unlock this". Each integration screen also needs its own plan feature. An agency's agents use the agency's plan.

**External services:** both integrations talk to real outside systems (Meta / Facebook and Property Finder). Section 2.4 lists what you can test with no outside account and what needs a **test Facebook Page** or **Property Finder test keys** provided by the project lead. Never use a real business Page or a real agency's Property Finder keys.

## 1. What this module does

### Integrations hub

One tile per integration (category, name, short description, status chip) plus a "More integrations coming" tile. Tile footer says **Connect** (not connected, partner) or **Open**.

### Facebook Lead Ads

Connect Facebook Pages. Every submission of a lead form (Instant Form) on a connected Page becomes a CRM lead in the account that owns the Page. The ad set / ad name becomes the lead's Source.

### Property Finder

An agency or independent agent saves its Property Finder API key and secret, then imports its live listings as MW Realty properties. Every imported listing waits for Super Admin review before it can go on the website.

## 2. How it works (business rules)

### 2.1 Hub status chips

| Integration | Possible status |
|---|---|
| Facebook Lead Ads | "Paid plans only" (plan lacks it) · "Not set up" (MW Realty has not configured its Facebook app) · "N page(s) connected" · "Not connected". Super Admin's count = all Pages of all accounts. |
| Property Finder | Partner: "Paid plans only" · "Syncing…" · "Connected" · "Not connected". Super Admin: "N to review" (imports waiting) or "N account(s) connected". |

### 2.2 Facebook Lead Ads

Continue with Facebook (popup) → Facebook login + permissions → Pick / assign Pages → Connect Pages → New form leads arrive in Leads

- **Who connects:** Super Admin connects Pages and **assigns each Page** to an approved, active agency or independent agent ("Assign to agency / agent…"). Pages left unassigned are skipped. An Agency or

independent Agent ticks its own Pages. An **agency agent** may also connect Pages; those are the agent's own and the leads come to the agent as personal leads, not to the agency (notice shown on screen).

- **One Page = one account.** A Page already connected to another account shows "Connected to <account>" (partners see "another account") and cannot be picked. A Page already connected to the same account shows "Connected — access will be refreshed".
- **Pending Pages expire:** the list of Pages from a Facebook login waits 15 minutes. After that, log in again.
- **Import existing leads (optional):** switch "Also import the leads these Pages already have" with "All leads (no date limit)", "Last 90 days", "Last 30 days" or "Last 7 days". Runs in the background with live progress ("Starting lead import…", "Importing leads… N added, M already in CRM"), then "Imported N leads, M already in the CRM" for 3 days.
- **New leads:** Facebook notifies MW Realty within seconds; the lead is created in the Page's account and assigned by the account's normal lead assignment, with the usual new-lead bell / email. Lead message holds the form answers and Campaign, Ad set, Ad, Form, Platform.
- **Source:** ad set name, else ad name, else "Facebook Lead Ads" (organic or test leads). A missing source is created automatically in the account's sources.
- **Duplicates:** each Facebook lead is imported only once. If the same person (email / phone) is already a lead of that account from the **same** ad set / ad, nothing new is added (counted as "already in the CRM"). From a **different** ad, the existing lead is updated with a new history entry instead of a duplicate.
- **Sync now:** fetches leads since the last sync (first time: all) right away and shows a toast. **All leads:** re-fetches everything in the background. Both send one summary email to the account (and to agents who received leads) instead of one email per lead. Limited to 10 syncs per minute.
- **Broken access:** if Facebook rejects the Page's access (password changed, admin removed, permission missing), the row shows "Reconnect needed" with the reason, a warning box lists the Page, and the owner is emailed once ("Owner emailed <date>"). A daily check at 08:00 also detects this. After reconnecting, missed leads are fetched automatically.
- **Disconnect:** stops new leads; leads already in the CRM stay. Bulk disconnect is available with row tick boxes.

## 2.3 Property Finder

- **Connect:** "Verify & connect" checks the key and secret with Property Finder first, then saves them (secret stored encrypted, key shown masked, e.g. `abcd•••••wxyz`). Connecting does **not** import anything. Toast: "Property Finder connected — click Import all listings when you're ready."
- **First import:** only **Import all listings** is shown until one full import has finished. After that: **Sync new listings** (only listings added since the last sync) and **Re-check all** (every live listing; already imported ones are skipped).
- **Background job:** live card "Importing your listings…" / "Checking for new listings…" with counters "imported", "already here", "failed". "Waiting for the background worker to pick it up…" if it has not started after about 75 seconds. Result line: "Last sync <time>: N new listings, M already here, K failed."
- **What is skipped:** drafts / non-live listings; a listing already imported by any account; a listing whose permit number the account already has; a listing Super Admin rejected (never imported again).
- **Plan limit:** the import stops when the plan's listing allowance is used up and shows a message to upgrade or sync again next month.
- **Imported properties** are created hidden from the website, label "In MW Realty review". Super Admin gets a bell "Property Finder listings to review".
- **Super Admin review:** tabs "Waiting for review", "Approved", "Rejected". **Approve** → the listing joins the normal permit flow: with complete permit details it goes live, otherwise it stays off the website until the

account completes the permit. **Reject** → the property and photos are deleted and it is never imported again; optional reason is sent to the account. The account gets a bell either way.

- **Disconnect:** forgets the keys. Imported properties stay.
- **Agency agents** see the agency's connection ("managed by <agency>") and may run syncs, but cannot change keys or disconnect.

### 2.4 What you can test without external accounts

| Area | No external account needed | Needs a provided sandbox / test asset |
|---|---|---|
| Access & locks | Menu padlocks, KYC message, "Unlock …" plan cards, hub tiles and status chips, role differences, review queue blocked for partners. | — |
| Facebook | "Not set up" state (if the test server has no Facebook app), empty state and the "How to connect a Facebook Page" guide, popup opens (stop at the Facebook login screen), Cancel on the Facebook dialog gives an error banner. | A test Facebook user who is admin of a **test Page** with a lead form; Meta's Lead Ads Testing Tool (or a test form submission) for new leads; the server's Facebook app must be configured and reachable by Facebook. Needed for: Page picking, assignment, Connect Pages, import, Sync now / All leads, webhook leads, duplicates, Reconnect, Disconnect of a real connection. |
| Property Finder | Connect form layout, required fields, show / hide secret, "What gets imported" panel. Agency-agent view without connection. Review queue screens, tabs, search, empty state (with existing test data). | **Test API key + secret** (ideally a Property Finder sandbox / test account) for: Verify & connect, wrong-key error, Import all, Sync new, Re-check all, review of freshly imported listings, Disconnect. Ask before sending even a deliberately wrong key: it is a real login attempt to Property Finder. |

## 3. Who can do what

| Action | Super Admin | Agency | Agent |
|---|---|---|---|
| Open Integrations hub | **Yes** | **If approved + plan** | **If approved + plan** |
| Facebook: connect Pages | **Yes, assigns owner** | **Own** | **Own (personal)** |
| Facebook: see connected Pages | **All** | **Own** | **Own** |
| Facebook: Sync now / All leads / Disconnect / bulk disconnect | **Any Page** | **Own** | **Own** |
| Property Finder: connect / Update API keys / Disconnect | **No** | **Yes** | **Independent only** |
| Property Finder: Import / Sync / Re-check | **No** | **Yes** | **Yes (agency agent: agency's)** |
| Property Finder review (approve / reject) | **Yes** | **No** | **No** |
| KYC pending | — | **Locked** | **Locked** |
| Plan lacks the feature | — | **Unlock card** | **Unlock card** |

Super Admin sees all Facebook Pages with a "Leads go to" column, search and 20 per page. Agency agents use the agency's plan, may connect their own Facebook Pages (leads come to them personally) and may sync the agency's Property Finder connection but not change it. KYC pending: direct URLs show "Your account is pending Super Admin approval." Plan lock detail: the hub opens if the plan has *either* feature. If it has only one, the other tile shows "Paid plans only" and opening it shows its "Unlock Facebook Lead Ads" / "Unlock Property Finder" card. The card text reads "… isn't included in your <plan> plan." (agency agent: "… isn't included in <agency>'s <plan> plan. Ask your agency to upgrade.").

## 4. Fields and validation

| Field | Required | Rules / messages |
|---|---|---|
| PF API key / API secret | Yes | Max 255 characters each; spaces at the ends are removed. Browser blocks empty submit. Wrong keys: "Property Finder rejected the API key or secret — check them in PF Expert › Settings › API." Service down: "Property Finder could not be reached — try again in a few minutes." Key used by another account: "This Property Finder API key is already connected to another MW Realty account." Max 10 connect attempts per minute. |
| PF Update API keys (New API key / New API secret) | Yes | Same rules. Success: "Property Finder keys updated." |
| PF review reason | No | "Reason (sent with a rejection)", max 500 characters. |
| Facebook Page assignment (Super Admin) | At least one | None assigned: "Choose an agency or agent for at least one Page." Only approved, active agencies and independent agents are listed ("Name — Agency (email)" / "Name — Agent (email)"). |
| Facebook Page selection (partner) | At least one | **Connect Pages** disabled when 0 selected. Counter "N of M Pages selected". "Select all" skips blocked Pages. |
| Import period | No | Only when the import switch is on: All leads / Last 90 / 30 / 7 days. |

## 5. Test scenarios

Priority: **High** core flow / data loss / access · **Medium** · **Low** cosmetic. **[No ext]** = no outside account needed. **[FB test Page]** / **[PF test keys]** = run only with assets provided by the project lead.

| | Scenario | Steps | Expected result |
|---|---|---|---|
| **IN-01** | **Hub as paid Agency [No ext]** High | 1. Sign in as an approved Agency on a plan with both features.<br>2. Sidebar › Leads › Integrations. | Title "Integrations". Tiles "Facebook Lead Ads" (Leads) and "Property Finder" (Listings) with correct status chips; "More integrations coming" tile. Clicking a tile opens its screen; "All integrations" link returns. |
| **IN-02** | **Plan without either feature [No ext]** High | 1. Sign in as an approved Agency on a free plan.<br>2. Check the sidebar; open `/crm/integrations`. | Padlock "Upgrade your plan to unlock this". Page shows "Unlock integrations" card with "Integrations aren't included in your <plan> plan." and **View Plans**. No integration data. |
| **IN-03** | **Plan with only one feature [No ext]** Medium | 1. Plan includes Property Finder but not Facebook.<br>2. Open hub, then the Facebook tile. | Hub opens; Facebook tile "Paid plans only". Facebook screen shows "Unlock Facebook Lead Ads" card. Property Finder works. |
| **IN-04** | **Agency agent on agency's free plan [No ext]** Medium | 1. Sign in as an agent of an agency whose plan lacks the features.<br>2. Open `/crm/integrations`. | Card says "... aren't included in <agency>'s <plan> plan. Ask your agency to upgrade." No View Plans button. |
| **IN-05** | **KYC pending [No ext]** High | 1. Sign in as a not-yet-approved Agency or Agent.<br>2. Check the sidebar; type `/crm/integrations`. | Padlock "Unlocks after KYC approval". Direct URL shows "Your account is pending Super Admin approval." with "Try again"; no data. |
| **IN-06** | **Super Admin hub [No ext]** Medium | 1. Open Integrations from the CRM as Super Admin. | Admin descriptions ("Connect Facebook Pages and send each one's lead form leads to an agency or agent.", "Agencies and agents import their Property Finder listings — you review them before they go live."). PF chip "N to review" when imports wait, else "N accounts connected". Never plan-locked. |
| **IN-07** | **Facebook not configured [No ext]** Low | 1. On a test server without the Facebook app set up, open Facebook as a partner, then as Super Admin. | Chip "Not set up". Partner: "The Facebook integration isn't available yet — MW Realty is setting it up." Super Admin: warning "Facebook app credentials missing" with setup instructions. No connect button. |
| **IN-08** | **Facebook empty state and guide [No ext]** Low | 1. Partner with no Pages opens Facebook Lead Ads.<br>2. Expand "How to connect a Facebook Page". | "Connect your Facebook Page" with **Continue with Facebook** and 3 steps (Connect the Page, Leads arrive instantly, Sorted by ad). Guide shows Before you start / Connecting / If something goes wrong. |
| **IN-09** | **Facebook popup and cancel [No ext]** Medium | 1. Click **Continue with Facebook**.<br>2. In the Facebook window, cancel / do not allow. | A Facebook window opens (if pop-ups are blocked, the whole tab goes to Facebook). After cancel the window closes and a red banner starts "Facebook connection cancelled". Nothing is connected. |

| | Scenario | Steps | Expected result |
|---|---|---|---|
| **IN-10** | **Partner connects a test Page [FB test Page]** High | 1. Continue with Facebook, log in with the test user, keep all permissions on.<br>2. Back in the CRM, tick the test Page, leave import off, click **Connect Pages**. | Toast "Choose the Facebook Pages to connect." after login. Busy overlay "Connecting your Pages...". Toast "Connected: <Page>. New Facebook leads will arrive in Leads." Row shows status "Receiving leads", Leads 0. Hub tile "1 page connected". |
| **IN-11** | **Super Admin assigns Pages [FB test Page]** High | 1. As Super Admin, connect with a test user that manages 2 test Pages.<br>2. Assign Page 1 to a test agency, leave Page 2 empty, click Connect Pages.<br>3. Repeat with none assigned. | Heading "Assign your Facebook Pages". Page 1 connected; toast "Connected: Page 1 → <agency>." Page 2 skipped. With none assigned: "Choose an agency or agent for at least one Page." Table shows "Leads go to" column. |
| **IN-12** | **Page already used by another account [FB test Page]** High | 1. Test Page is connected to account A.<br>2. Account B logs in with a user that manages the same Page. | Page card shows "Connected to another account", greyed, cannot be ticked. Account A still receives the leads. |
| **IN-13** | **Reconnect same Page [FB test Page]** Medium | 1. Same account logs in to Facebook again. | Card chip "Connected — access will be refreshed". Connecting again keeps one row (no duplicate). |
| **IN-14** | **Import existing leads [FB test Page]** High | 1. Connect a test Page that already has test leads, switch on "Also import...", choose Last 30 days.<br>2. Watch the row. | Toast ends "Importing their leads in the background — you can keep working." Row shows "Importing leads... N added". When done: "Imported N leads, M already in the CRM". Only leads from the last 30 days come in. One summary email (no per-lead emails). |
| **IN-15** | **New lead arrives automatically [FB test Page]** High | 1. Submit the test lead form (or Meta's Lead Ads Testing Tool).<br>2. Wait up to a minute; open Leads. | New lead with name / email / phone from the form, other answers and Campaign / Ad set / Ad / Form in the message. Source = ad set or ad name, or "Facebook Lead Ads" for a test lead. Leads count and "Last lead" update on the Facebook screen. Owner gets the normal new-lead notification. |
| **IN-16** | **Duplicate submission [FB test Page]** High | 1. Submit the same form again with the same email / phone.<br>2. Run **Sync now**. | No second lead. Same ad: nothing added ("already in the CRM"). Different ad: existing lead gets a new history entry and the toast counts it as "existing lead updated". |
| **IN-17** | **Sync now [FB test Page]** Medium | 1. Click **Sync now** with no new leads, then after a new submission. | "No new leads on <Page>." / "<Page>: 1 new lead. A summary email is on its way." "Synced <time>" under Last lead. Buttons disabled while running. |
| **IN-18** | **All leads [FB test Page]** Medium | 1. Click **All leads**; click it again while running. | "Fetching all leads from <Page> in the background — you'll get one summary email when it's done." Second click: "<Page> is already importing — see its progress below." No duplicates created. |

| | Scenario | Steps | Expected result |
|---|---|---|---|
| **IN-19** | **Disconnect one / bulk [FB test Page]** High | 1. Click Disconnect; read the dialog; confirm.<br>2. Tick 2 rows, **Disconnect selected**. | Dialog "Disconnect <Page>?" with "New Facebook leads from this Page will stop coming in. Leads already in the CRM stay." Toast "<Page> disconnected — its leads already in the CRM stay." / "2 Pages disconnected — ...". Imported leads remain in Leads. New form submissions no longer arrive. |
| **IN-20** | **Reconnect needed [FB test Page]** Medium | 1. Remove the MW Realty app from the test user's Facebook business integrations (or remove the user as Page admin).<br>2. Click Sync now. | Error "<Page> needs reconnecting: ... Click Reconnect and log in with Facebook again." Row "Reconnect needed" with reason; warning box above; **Reconnect** button. Owner emailed once. After reconnecting, status returns to "Receiving leads". |
| **IN-21** | **Pending Pages: remove / cancel / expiry [FB test Page]** Low | 1. After login, click X on a Page card; then Cancel.<br>2. Log in again and wait 15+ minutes before connecting. | X removes the card; removing the last one or Cancel clears the picker. After 15 minutes the picker is gone; log in again. |
| **IN-22** | **Super Admin Page search / paging [FB test Page]** Low | 1. Search a Page or account name in "Search Page or account...". | Matching rows only; unknown text: "No connected Pages match "..."." Pagination after 20 Pages. |
| **IN-23** | **PF connect form [No ext]** Medium | 1. Agency opens Property Finder (not connected).<br>2. Submit empty; toggle the eye icon. | Step strip with Connect current. Fields "API key", "API secret". Empty submit blocked by the browser. Eye shows / hides the secret. Note "Nothing is imported yet". |
| **IN-24** | **PF wrong keys [PF test keys]** High | 1. Enter a wrong key / secret, **Verify & connect**. | Button shows "Checking with Property Finder...", then red banner "Property Finder rejected the API key or secret — check them in PF Expert › Settings › API." Nothing saved; status stays "Not connected". |
| **IN-25** | **PF connect with valid keys [PF test keys]** High | 1. Enter the provided test key and secret, Verify & connect. | Toast "Property Finder connected — click Import all listings when you're ready." Status "Connected", masked key, Imported 0, Last sync "Never". Only **Import all listings** is offered. No properties created yet. |
| **IN-26** | **Key already used [PF test keys]** Medium | 1. Second test account enters the same key. | "This Property Finder API key is already connected to another MW Realty account." |
| **IN-27** | **Import all listings [PF test keys]** High | 1. Click **Import all listings**; leave and come back. | Toast "Importing your Property Finder listings in the background — you can keep working." Live card with counters. Result "Last sync ...: N new listings, M already here." New properties appear in Properties labelled "In MW Realty review" and are not on the website. Super Admin bell "Property Finder listings to review". Buttons change to **Sync new listings** and **Re-check all**. |

| | Scenario | Steps | Expected result |
|---|---|---|---|
| IN-28 | **Sync new / Re-check all [PF test keys]** Medium | 1. Add one test listing on Property Finder; click **Sync new listings**.<br>2. Click **Re-check all**.<br>3. Click a sync button twice quickly. | Sync new: "Checking Property Finder for new listings…", 1 new. Re-check all: 0 new, rest "already here". Second click: "A Property Finder sync is already running — see its progress below." No duplicate properties. |
| IN-29 | **Plan listing limit during import [PF test keys]** Medium | 1. Use an account whose plan allows fewer listings than PF has.<br>2. Import all. | Import stops at the limit; result shows a message to upgrade the plan (or sync again next month for monthly plans). Next sync after upgrading imports the rest without duplicates. |
| IN-30 | **Update keys / disconnect [PF test keys]** High | 1. "…" menu › **Update API keys**, enter test keys, **Verify & save**.<br>2. "…" › **Disconnect**, confirm. | "Property Finder keys updated." Dialog "Disconnect Property Finder?" — "Syncing stops. Listings already imported stay in your properties." Toast "Property Finder disconnected — imported listings stay in your properties." Imported properties remain. |
| IN-31 | **Agency agent view [No ext / PF test keys]** High | 1. Agent of an agency with no connection opens Property Finder.<br>2. Agency connects; agent reopens. | First: "Your agency hasn't connected Property Finder yet". Then: connection shown with "managed by <agency>", sync buttons available, no "…" menu (cannot change keys or disconnect). |
| IN-32 | **Super Admin PF screen [No ext]** Medium | 1. Super Admin opens Property Finder. | No connect form. Stats "Connected accounts" and "Waiting for review"; button "Review imported listings (N)". |
| IN-33 | **Review queue basics [No ext with test data]** Medium | 1. Open the review page. Switch tabs; search by title, reference or account. | Title "Property Finder — imported listings". Tabs with counts. Columns Listing, Account, Price (AED), Permit ("No permit" chip if none), Imported (+ Reviewed on other tabs). No match: "No listings match "…"."; empty tab: "Nothing here." |
| IN-34 | **Approve imports [PF test keys]** High | 1. Tick 2 waiting listings (one with complete permit, one without), click **Approve**. | "2 listings approved." Both move to Approved. The listing with complete permit details goes live on the website; the other stays off until the account completes its permit. Account gets bell "Property Finder listings approved". |
| IN-35 | **Reject imports [PF test keys]** High | 1. Tick a waiting listing, type a reason, click **Reject**, confirm.<br>2. Account runs Re-check all. | Dialog "Reject the selected listings?" — "Their properties and photos are removed, and they won't be imported again." Toast "1 listing rejected and removed." Property gone from the account; Rejected tab shows the reason. Re-check does not import it again. Account bell "Property Finder listings rejected: <reason>". |
| IN-36 | **Partner cannot open review [No ext]** High | 1. As Agency, type `/crm/integrations/property-finder/review`. | Error message, no listings shown; no Approve / Reject. |

| | Scenario | Steps | Expected result |
|---|---|---|---|
| IN-37 | **Stuck background job [PF test keys]** Low | 1. Only if the lead can pause the server worker: start a sync and wait. | After ~75 s: "Waiting for the background worker to pick it up…". After 15 min queued: "Last sync failed: The sync never started — …". |
| IN-38 | **Mobile width [No ext]** Low | 1. Open hub, Facebook and Property Finder at about 375 px. | Tiles stack; tables scroll inside their box; buttons reachable; no page-wide horizontal scroll. |

## 6. Expected results checklist

- [ ] Locks: KYC pending and plan-without-feature show the right padlock and message; Super Admin never locked.
- [ ] Hub chips match the real state for each role.
- [ ] A Facebook Page belongs to one account only; blocked Pages cannot be picked.
- [ ] Facebook leads arrive in the right account with correct Source and details; no duplicates.
- [ ] Sync now, All leads, import period and progress counters behave as described; one summary email per bulk sync.
- [ ] Disconnect (Facebook / PF) keeps existing leads / properties.
- [ ] PF keys are verified before saving, shown masked, and cannot be shared between accounts.
- [ ] PF imports are hidden until Super Admin approves; rejected listings are deleted and never re-imported.
- [ ] Agency agents can sync the agency's PF connection but cannot change it; partners cannot open the review queue.

## 7. Known behaviour (not bugs)

**By design:**

- Connecting Property Finder does not import anything; the user must click Import all listings.
- Sync new listings and Re-check all appear only after one full import has finished.
- Approved PF listings without complete permit details stay off the website.
- A Page an agency agent connects sends leads to the agent personally, not to the agency.
- Facebook leads from the same person and same ad are skipped, not added again; Facebook's own lead count can be higher than the CRM's.
- Bulk imports send one summary email, not one email per lead.
- Results of a Facebook import ("Imported N leads…") show for 3 days only.
- Facebook only delivers leads when the server is reachable from the internet; on a local test server only Sync now / All leads can bring leads in.

**Test-data cautions:** use only the test Facebook user, test Page and test PF keys you were given. Never connect a real business Page or real agency keys; never trigger real ad campaigns or payments. Do not paste API secrets into bug reports or screenshots. Reject permanently deletes the property: only reject test imports. Do not disconnect another tester's connection.

## 8. Reporting a bug

Include: scenario ID, role and account, plan, KYC state, integration, Page name / ID or PF reference, sync mode and import period, the toast or banner text, counters shown, CRM lead or property ID, time, expected vs actual, screenshot (with keys hidden). Note whether the test server can receive Facebook notifications.
