MW REALTY CRM · TESTER HANDBOOK · MODULE 19

Contact Us

Support tickets: raising a ticket, the conversation thread, statuses, attachments, the “needs your reply” badge and the Admin side

Where: CRM sidebar › Support › **Contact Us** (`/crm/contact` , `/crm/contact/tickets/create` , `/crm/contact/tickets/{id}`). Admin side: Admin › **Support Tickets**. Old links `/portal/contact…` redirect here.
Who: Agency and Agent (each account has its own tickets). Super Admin answers in Admin, not in the CRM.
Locks: none — available **before KYC approval** and on every plan.

1. What this module does

Contact Us is a ticket desk between an account and the MW Realty support team. The user raises a ticket with an issue type, priority, subject, message and an optional file. Support replies in Admin. Both sides write in one conversation, and every status change is written into the same thread, so the thread is the full history. The user can mark a ticket as solved, reopen it, or reply to reopen it.

Contact Us (list)

Stat cards **Total Tickets**, **Open**, **Awaiting Your Reply**, **Solved**; **Ticket History** with issue-type filter, search, tabs; **Get in touch** card; button **Raise a Ticket**.

Raise a Ticket

Issue Type, **Priority**, **Subject**, **Describe the issue**, **Attachment** (optional), **Submit Ticket** / **Cancel**.

Ticket page

Reference + status, **Conversation**, **Reply** box, **Ticket Details**, buttons **Mark as Solved** / **Reopen**, **My Tickets**.

2. How it works (business rules)

2.1 Statuses

User sees	Admin sees	Meaning
Open	Open	New, or the user replied / reopened. Waiting for support.
In Progress	In Progress	Support is working on it.
Awaiting Your Reply	Awaiting Client	Support answered or asked for information.
Solved	Solved	Marked solved by user or support. Can still be reopened.
Closed	Closed	Final. No replies; “This ticket is closed” and a link to raise a new one.

2.2 Transitions

Raised → Open → Support replies → Awaiting Your Reply → User replies → Open → Solved → Closed (by support)

- **Support reply** (Admin): status after reply defaults to “Automatic (Awaiting Client)” — an Open or In Progress ticket becomes **Awaiting Your Reply**; other statuses stay as they are. Support can also choose

a status in **Status after reply**.

- **User reply**: a ticket in Awaiting Your Reply or Solved goes back to **Open**. A ticket In Progress stays In Progress. Closed ticket: refused with “This ticket is closed. Please raise a new ticket if you still need help.”
- **Mark as Solved** (user, confirm “Resolve support ticket?”) → **Solved**, “Solved” date shown in Ticket Details. Toast “Thanks — the ticket has been marked as solved.”
- **Reopen** (only on Solved) → Open. Toast “The ticket has been reopened.” On a Solved ticket the reply box title is “Not solved after all? Reply to reopen”.
- **Admin › Ticket Details** can set any status and priority with **Update Ticket**.
- Every status change adds a grey history line in the thread: “Status changed from <old> to <new> by <name>.” (uses the Admin labels, e.g. “Awaiting Client”). Priority changes by support add “Priority changed from X to Y by <admin>.”
- Reference format: **TKT-00012**. Support messages are signed “MW Realty Support” on the user side; the user's own messages show “You”.

2.3 List, badge and sorting

- **Tabs:** All · **Open** (Open + In Progress + Awaiting Your Reply) · **Awaiting Reply** · **Solved** · **Closed**. Issue type drop-down and search (“Subject or ticket no.” — TKT-00012, 00012 or 12 all find ticket 12). 10 per page.
- **Sort:** Awaiting Your Reply first (row highlighted), then Open / In Progress, then the rest; newest activity first in each group.
- Each row: subject, reference, issue type, priority chip only for High / Urgent, number of messages (history lines not counted), “Updated … ago”, status badge.
- **Sidebar badge on Contact Us** = number of not-yet-solved tickets where support had the last word or the status is Awaiting Your Reply.
- **Stat cards:** Total, Open (all three active statuses), Awaiting Your Reply, Solved (Solved + Closed).

2.4 Notifications

- User gets a **bell notification** (in the CRM, not email) when support replies (“Support replied to your ticket”) or when support changes the status (“Ticket solved”, “Ticket closed”, “Ticket in progress”…). Clicking it opens the ticket.
- Admins with support-ticket access get an Admin bell for: “New support ticket”, “Client replied”, “Ticket marked solved”, “Ticket reopened”.
- No emails are sent for tickets.

2.5 Get in touch card

Shows MW Realty's Phone, WhatsApp, Email, Office and Working Hours from Admin site settings. Only filled-in items are shown.

3. Who can do what

Action	Super Admin	Agency	Agent
See Contact Us in the CRM menu	**No**	**Yes**	**Yes**

Action	Super Admin	Agency	Agent
Raise / reply / solve / reopen own tickets	**No (CRM shows "Support tickets are raised by agent and agency accounts.")**	**Own only**	**Own only**
See another account's tickets	**Admin › Support Tickets**	**No (an agency does not see its agents' tickets)**	**No**
Reply as support, change status / priority	**Admin (with permission)**	**No**	**No**
KYC pending	n/a	**Full access**	**Full access**

4. Fields and validation

Field	Required	Rules / limits
Issue Type	Yes	Account & Profile, KYC / Verification, Property Listings, Leads & CRM, Plans & Subscription, Payments & Invoices, Agency & Agents, Technical Issue / Bug, Feature Request, Other.
Priority	Yes (preset Normal)	Low, Normal, High, Urgent.
Subject	Yes	Max 150 characters.
Describe the issue / Reply	Yes	Max 5000 characters.
Attachment	No	One file per message: JPG, JPEG, PNG or PDF; max 4 MB.
Rate limits	—	Max 10 new tickets and 20 replies per minute per user; more gives a "Too Many Attempts" error.

Success after submit: "Ticket TKT-000NN has been raised — our team will get back to you shortly." and the ticket page opens. Reply: "Your reply has been sent."

5. Test scenarios

Priority: **High** core flow / data loss / access · **Medium** · **Low** cosmetic. Needs: one approved Agency, one Agent, one KYC-pending account, and an Admin login with Support Tickets access. Start every subject with “QA TEST”.

	Scenario	Steps	Expected result
CU-01	**Open Contact Us** High	1. Sign in as Agency; click **Contact Us**.	Heading “Contact Us”, four stat cards, Ticket History, Get in touch card, **Raise a Ticket** button.
CU-02	**Empty state** Low	1. New account with no tickets.	“No tickets yet” and “Something not working? Raise a ticket and our team will help.” Stats all 0.
CU-03	**Raise a ticket** High	1. Click **Raise a Ticket**. 2. Issue Type “Technical Issue / Bug”, Priority High, Subject “QA TEST login”, description. 3. **Submit Ticket**.	Toast “Ticket TKT-000NN has been raised — our team will get back to you shortly.” Ticket page opens: status **Open**, your message as “You”, Ticket Details filled. Admin gets bell “New support ticket”.
CU-04	**Required fields** Medium	1. Submit with no Issue Type; then no Subject; then no description.	Browser blocks submit on each empty required field. No ticket created.
CU-05	**Length limits** Low	1. Paste 200 characters into Subject and 6000 into description.	Inputs stop at 150 and 5000 characters.
CU-06	**Attachment OK** High	1. Raise a ticket with a 1 MB PNG. 2. Click the paperclip link in the thread.	Thread shows the file name with a paperclip; clicking downloads the same file. Admin can download it too.
CU-07	**Attachment rules** Medium	1. Attach a 5 MB PDF; submit. 2. Attach a .docx (choose “All files”); submit.	Error under Attachment (max 4 MB / must be jpg, jpeg, png, pdf). No ticket created.
CU-08	**Support replies** High	1. In Admin › Support Tickets open the ticket; type a reply; leave “Automatic (Awaiting Client)”; **Send Reply**. 2. As the user refresh.	Admin: “Reply sent to the client.” User: bell “Support replied to your ticket”; status **Awaiting Your Reply**; message from “MW Realty Support”; grey line “Status changed from Open to Awaiting Client by <admin>.” Sidebar badge shows 1.
CU-09	**Badge and sort** High	1. Have 3 tickets: one Awaiting Your Reply, two Open. 2. Open Contact Us.	Awaiting ticket is first and highlighted. Badge = 1. Stats: Open 3, Awaiting 1.
CU-10	**User replies** High	1. On the awaiting ticket write a reply; **Send Reply**.	“Your reply has been sent.” Reply appears as “You”; status back to **Open** with a history line; reply box cleared; badge clears. Admin bell “Client replied”.
CU-11	**Reply with attachment** Medium	1. Reply with a JPG. 2. Reply with a 5 MB file.	First: file linked under the reply. Second: error under the file input, reply not sent, text kept.
CU-12	**Empty reply** Low	1. Click **Send Reply** with empty text.	Blocked by browser; nothing sent.

	Scenario	Steps	Expected result
CU-13	**In Progress reply** Medium	1. Admin sets status In Progress with **Update Ticket**. 2. User replies.	User gets bell “Ticket in progress”. After the user reply the status stays **In Progress**.
CU-14	**Mark as Solved** High	1. Click **Mark as Solved**; confirm.	“Thanks — the ticket has been marked as solved.” Status **Solved**; “Solved” date in details; button changes to **Reopen**; reply title “Not solved after all? Reply to reopen”. Admin bell “Ticket marked solved”. Cancel in the dialog does nothing.
CU-15	**Reopen** High	1. On a Solved ticket click **Reopen**.	“The ticket has been reopened.” Status Open; history line; Admin bell “Ticket reopened”.
CU-16	**Reply to reopen** Medium	1. On a Solved ticket send a reply.	Status Open; Solved date removed.
CU-17	**Closed ticket** High	1. Admin sets status Closed. 2. User opens the ticket.	Bell “Ticket closed”. No reply box and no Reopen / Solve buttons; box “This ticket is closed — Still need help? Raise a new ticket.”
CU-18	**Admin solves** Medium	1. Admin sets Solved with Update Ticket.	User bell “Ticket solved”; ticket in Solved tab; stat Solved +1.
CU-19	**Priority change** Low	1. Admin changes priority Normal → Urgent.	User thread shows “Priority changed from Normal to Urgent by <admin>.”; list row shows Urgent chip.
CU-20	**Tabs** Medium	1. Click All, Open, Awaiting Reply, Solved, Closed.	URL `?status=`; rows match; Open includes In Progress and Awaiting.
CU-21	**Search and filter** Medium	1. Search “QA TEST”, then “TKT-000NN”, then the plain number. 2. Choose an issue type. 3. Search “nothing-here”.	Matching tickets only; filters combine with the tab. No result: “No tickets match these filters”.
CU-22	**Pagination** Low	1. With more than 10 tickets go to page 2.	10 per page; filters kept.
CU-23	**Another account's ticket** High	1. Note a ticket ID of Agency A. 2. As Agent B open `/crm/contact/tickets/{id}`.	Error, no ticket content; B cannot reply or download its attachments. B's list never shows A's tickets.
CU-24	**Agency vs its agent** Medium	1. Agent of an agency raises a ticket. 2. Agency opens Contact Us.	Agency does not see the agent's ticket; each account has its own list.
CU-25	**KYC-pending** High	1. Sign in as not-approved account; open Contact Us; raise a ticket.	No padlock; ticket raised normally.
CU-26	**Super Admin in CRM** Medium	1. Open CRM from Admin; check sidebar; type `/crm/contact`.	No Contact Us item. Page shows “Support tickets are raised by agent and agency accounts.”

	Scenario	Steps	Expected result
CU-27	**Bell link** Medium	1. Click the bell notification of a support reply. 2. Open an old `/portal/contact` link.	Opens the ticket page. Old link redirects to the CRM Contact Us.
CU-28	**Get in touch** Low	1. Compare the card with Admin site settings (phone, WhatsApp, email, address, hours).	Same values; empty settings are not shown.
CU-29	**Double submit** Medium	1. Click **Submit Ticket** twice quickly.	Button disabled while sending; only one ticket created.
CU-30	**Rate limit** Low	1. Raise 11 tickets within one minute (test environment).	11th refused with a “Too Many Attempts” error toast; works again after a minute.
CU-31	**Mobile width** Low	1. Open list, form and ticket at ~375 px.	Cards stack; Get in touch below the list; thread bubbles readable; buttons reachable.

6. Expected results checklist

- [ ] Ticket raised with correct type, priority, subject, message and attachment; reference TKT-xxxxx.
- [ ] Status follows the rules: support reply → Awaiting Your Reply; user reply → Open (except In Progress); Solved can reopen; Closed is final.
- [ ] Every status / priority change appears as a history line in the thread.
- [ ] Badge counts tickets needing the user's reply; awaiting tickets sorted first.
- [ ] Users see only their own tickets; attachments only downloadable by the owner and Admin.
- [ ] Bell notifications on both sides; no emails.
- [ ] Works for KYC-pending accounts; Super Admin uses Admin instead.

7. Known behaviour (not bugs)

By design:

- The user's history lines use Admin wording, e.g. “Status changed from Open to Awaiting Client by …”, while the badge says “Awaiting Your Reply”.
- A user reply on an In Progress ticket keeps it In Progress.
- Support replying to a Solved ticket (with Automatic status) keeps it Solved.
- The message count on a row does not count grey history lines.
- Ticket updates are in-app notifications only; no email is sent.
- An agency cannot see tickets its agents raised.

Test-data cautions: on a live or shared site, real support staff read these tickets. Mark every subject “QA TEST”, never attach real IDs, invoices or personal data, and ask support before raising many tickets. Use dummy images / PDFs only.

8. Reporting a bug

Include: role and account, ticket reference (TKT-…), status before and after, which side acted (user or Admin), steps, expected vs actual, time, screenshot of the thread. Use test data only.
