MW REALTY CRM · TESTER HANDBOOK · MODULE 20

Credits

Pay-as-you-go add-ons next to the plan: balance, history, calculator, buying credits by card and spending them on extra listings, Premium and ads

Where: CRM avatar (account) menu › **Credits**, right under Plans (`/crm/credits`). Also the **Credits** card in the left sidebar (only when credits matter). **Who:** Agency and independent Agent (the account that owns the listings). An agent inside an agency has no credits of their own. Super Admin can open the page to see every account's history. **Locks:** locked until KYC approval (“Unlocks after KYC approval”). Hidden when Super Admin switches credits off and the account has no credits left.

1. What this module does

A plan gives an account a fixed number of listings and Premium listings. **Credits** let the account go past that limit without changing plan. The account buys credits by card (Stripe) or MW Realty adds them. Each batch of credits is valid for a set number of days. Credits are spent on:

- **Extra listing** – one listing beyond the plan's listing allowance.
- **Premium for 7, 15 or 30 days** – a Premium listing that does not use the plan's premium quota.
- **Advertisements** – a website ad booking after the plan's included ads for the month are used.

The cost in credits depends on the listing (category, offering, property type and price). Super Admin sets the price of one credit, VAT, validity and the cost table in **Admin › Credits**.

Balance card

Remaining credits “N of M”, a bar, “X% left · Y used”, next expiry (“N expire in D days”), buttons **Buy credits** and **Calculator**.

Your plan panel

Plan name, link **Plans →**, rows **New listings** and **Premium** (used / limit), and a note on when the allowance resets.

Period totals

Credits added, **Used on add-ons**, **Expired unused** for the chosen dates.

Transaction history

Search **Listing reference**, quick periods **30 days** / **90 days** / **12 months**, From → To dates, **Export CSV**, 20 rows per page.

Credit calculator (popup)

Category, Offering, Property type, Price (optional) → cost of an **Extra listing** and **Premium · 7 / 15 / 30 days**.

Buy credits (popup)

Choose how many credits, see subtotal + VAT + Total, then **Pay by card** with a Stripe card field.

2. How it works (business rules)

Buy credits (card) or MW Realty adds them → Batch valid for N days → Spent on extra listing / Premium / ad → Left-over credits expire

Wallet

- **One wallet per listing owner.** An Agency and an independent Agent each have their own wallet. An agent inside an agency has none: the agency buys and spends credits. The agent cannot buy, see the Credits page or pay with credits. When the agency's limit is reached, the agent is told to ask the agency (“Ask <Agency> to upgrade its plan or add credits…”).
- **Balance** = credits still valid and not yet spent. “of M” = all credits added that are still within their validity.
- **Oldest expiry spent first.** When credits are spent, the batch that expires first is used first.
- **Expiry:** each batch is valid for the number of days set by Super Admin (default 30), until the end of the last day. A background job runs every hour and writes off expired credits as one row **“Expired credits”** (originator **System**). The balance is also corrected straight away whenever the Credits page is opened or credits are spent.
- **Not enough credits:** the action is refused with “This needs X credits but you have Y. Top up to continue.” (the last sentence only while buying is switched on).
- **No price for this kind of listing:** “Credits aren't available for this kind of listing yet. Please contact MW Realty.”

Costs (cost table)

- Super Admin keeps a cost table. Each row can name a category (Residential / Commercial), offering, property type and a price range, with costs for **Extra listing**, **Premium 7**, **15** and **30 days**. Empty columns match anything. The most specific matching row is used.
- The AED value shown in the calculator (“≈ AED …”) is credits × price of one credit, **without VAT**.

Buying credits (Top up)

- Only an approved account that owns its wallet can buy, and only while credits are switched on **and** online card payment is set up. Otherwise the popup shows “Online payment isn't available right now — contact MW Realty to add credits to your account.” and **Continue to payment** is disabled.
- Amount must be a whole number between the minimum and maximum set by Super Admin (defaults 100 and 100,000). Total = credits × price + VAT (default 5%). The server recalculates the price; the popup only previews it.
- After the card is accepted, credits are added at once: “N credits added — valid until dd Mon yyyy.” If Stripe has not confirmed yet: “Payment received — we're confirming it with Stripe. Your credits will appear in a moment.” A background message from Stripe adds them later. The same payment never adds credits twice.
- History row: **Credit addition**, originator = the person who paid, “AED x paid”.

Spending credits

- **Extra listing:** when the plan's listing allowance is used up, **Add** in Properties / Commercial opens the choice popup (“You can still add this listing — choose how:” › **Use credits** *Add now* › **Continue with credits**, **Buy credits**, **See costs**). The form then shows a yellow note “… This listing will be added as an extra listing paid with credits. You have N credits — the cost depends on the category, type and price.” and a button **Credits & calculator**. Credits are taken when the listing is saved. History row **Extra listing** with the listing reference.
- **Premium with credits:** in the Premium popup, **Pay with** › **Credits**. Length 7, 15 or 30 days only; start date today or later; no end date to choose. The popup shows “Costs N credits · M available” or “— K short. Top up”. History row **Premium for N days**. The plan's premium quota is not used, and the plan's maximum length does not apply.
- **Premium paid with credits:** dates cannot be changed afterwards (“This premium was bought with credits for a fixed length, so its dates can't be changed…”). **Cancel before it starts** = credits refunded (“Refund — premium cancelled before it started”). **Stop early** = no refund.

- **Advertisements:** once the plan's included ads for the month are used, a booking is paid with credits (row “Advertisement: …”). Credits come back if the ad is cancelled before it runs (“Advertisement cancelled”), rejected (“Advertisement not approved”) or not reviewed in time (“Advertisement not reviewed in time”).

Admin › Credits switch (on / off)

- **On:** accounts can buy and spend credits.
- **Off:** nobody can buy. An account that still holds credits keeps the page, history and calculator, and can spend them until they expire. The page shows “Buying credits is paused by MW Realty for now — you can still use the credits you have until they expire.” and no **Buy credits** buttons. An account with no credits left does not see Credits anywhere; opening `/crm/credits` shows “Credits aren't available at the moment.”. Limit messages in Properties stop mentioning credits.
- Super Admin can still **Add credits** to an account by email from Admin, also while credits are off.

Sidebar Credits card

The card appears in the left sidebar only for an approved account that owns its wallet (not Super Admin, not an agency's agent, not KYC pending), and only when one of these is true:

- the account has credits (balance or active credits), or
- the plan's listing allowance is used up, or the plan's premium quota is used up, or
- listings are nearly used up: 10% or less of the plan's listing limit left, but at least 2 (e.g. limit 10 → shows at 2 or 1 left; limit 50 → at 5 or fewer).

Content: **Credits** balance “/active”; tag **Plan limit reached** or **N listings left** (opens Plans; tooltip explains); bar with “X used / Y left”; one button: **Add listing with credits** (listing allowance used up and balance > 0), otherwise **Buy credits** (opens the Credits page with the Buy popup) when buying is allowed. The card is highlighted when 25% or less is left or some credits expire within 3 days.

3. Who can do what

Action	Super Admin	Agency	Independent Agent	Agent in an agency
See **Credits** in the avatar menu	**No (open by URL)**	**Yes**	**Yes**	**No**
Open the Credits page	**Yes – all accounts**	**Own wallet**	**Own wallet**	**No – “Credits are managed by your agency, <Agency>.”**
Balance card, Calculator	**No**	**Yes**	**Yes**	**No**
Buy credits	**No**	**If credits on + card payments set up**	**Same**	**No**
Pay with credits (extra listing, Premium, ads)	**No**	**Yes**	**Yes**	**No – ask agency**
History: Account column	**Yes**	**No**	**No**	**—**

Action	Super Admin	Agency	Independent Agent	Agent in an agency
Export CSV	Yes	Yes	Yes	No
Sidebar credits card	No	When credits matter	When credits matter	No
Switch on/off, prices, costs, add credits (Admin › Credits)	Yes	No	No	No

KYC pending / rejected: Credits shows in the avatar menu with a padlock (tooltip “Unlocks after KYC approval”) only if credits are switched on and the account owns its listings. Opening it shows “Your account is pending Super Admin approval.” with **Try again**. No sidebar card. Nothing can be bought or spent. **Plan:** Credits is not a plan feature; it is open on every plan, including the free plan.

4. Fields and validation

Field	Required	Rules / limits
Buy credits › How many credits?	Yes	Whole number between Admin's minimum and maximum. Popup: “Enter between X and Y credits.” Server: “Top up between X and Y credits.” Quick picks from 500 / 1,000 / 2,500 / 5,000 / 10,000 that fit the limits (max 4 shown). −/+ change by 100. Starts at 1,000 (or the nearest limit).
Card details	Yes	Stripe card field. Errors come from Stripe and appear in red under the field.
Calculator › Category	Yes	Residential or Commercial (Residential pre-selected).
Calculator › Offering, Property type	Yes	From the site's filters. Until all three are chosen: “Pick a category, offering and property type to see the costs.”
Calculator › Price	No	Number, 0 or more (AED). Only matters if a cost row uses a price range.
History search	No	Listing reference, max 100 characters, partial match.
From / To	No	Default: one month ago → today. If From is after To, they are swapped.
Admin › Price of 1 credit	Yes	0.01 – 100,000 AED.
Admin › VAT added on top	Yes	0 – 100 %.
Admin › Credits last for	Yes	1 – 3,650 days.
Admin › Minimum / Maximum purchase	Yes	Minimum ≥ 1; Maximum ≥ Minimum.
Admin › Add credits	Yes	Login email of an existing agent/company; Credits 1 – 1,000,000; Note max 120 characters (default text “Credits added by MW Realty”). For an agency's agent the credits go to the agency.

5. Test scenarios

Priority: **High** core flow / money / access · **Medium** · **Low** cosmetic. Use Stripe **test mode** only.

	Scenario	Steps	Expected result
CR-01	**Open Credits as Agency** **High**	1. Sign in as an approved Agency. 2. Avatar menu › **Credits**.	Page “Credits” opens at `/crm/credits`. Balance card, Your plan panel, three totals and Transaction history are shown. Period line shows the last month.
CR-02	**Calculator happy path** **High**	1. Click **Calculator**. 2. Choose Residential, an offering (e.g. Rent) and a property type.	Under “Cost in credits”: **Extra listing** and **Premium · 7 / 15 / 30 days** cards with credits and “≈ AED …”. AED = credits × price of 1 credit (no VAT).
CR-03	**Calculator: no cost row** **Medium**	1. Ask the test lead for a combination with no cost row (or have Admin disable rows). 2. Choose it in the calculator.	Red message: “Credits aren't available for this kind of listing yet. Please contact MW Realty.”
CR-04	**Calculator: price range** **Medium**	1. Admin adds two rows for the same type with different price ranges. 2. In the calculator enter a price in each range.	Costs change to the row matching the price. **Clear** empties the choices and the result.
CR-05	**Buy credits – popup and preview** **High**	1. Click **Buy credits**. 2. Click each quick pick, then use − / +.	Title “Buy credits”, subtitle “Valid for N days — until <date>.” Receipt: “N credits × price AED”, “VAT x%”, “Total”. Values update with the amount. − disabled at minimum, + at maximum.
CR-06	**Amount out of range** **High**	1. Type an amount below the minimum, then above the maximum, then a decimal (e.g. 150.5).	Red text “Enter between X and Y credits.” **Continue to payment** is disabled.
CR-07	**Pay with Stripe test card** **High**	1. Enter 1,000 credits, **Continue to payment**. 2. Card 4242 4242 4242 4242, any future date, any CVC. 3. Click **Pay AED <total>**.	“Payment successful” and “1,000 credits added — valid until <date>.” **Done** closes. Balance +1,000. New top row **Credit addition**, “+1,000”, “AED x paid”, originator = your name. Sidebar card updates.
CR-08	**Declined test card** **High**	1. Repeat CR-07 with Stripe test card 4000 0000 0000 0002.	Red message from Stripe (card declined). No credits added, no history row. Pay button can be used again.
CR-09	**Card needing authentication** **Medium**	1. Use Stripe test card 4000 0025 0000 3155. 2. Complete the test pop-up; repeat and fail it.	Completed: credits added as in CR-07. Failed: error shown, nothing added.
CR-10	**Back / change amount** **Medium**	1. On “Pay by card” click **Back**, change the amount, continue and pay with 4242….	Charge and credits match the new amount (check the history row and Stripe test dashboard if available).
CR-11	**Online payment not set up** **Medium**	1. On a test site without Stripe keys, open **Buy credits**.	Yellow note “Online payment isn't available right now — contact MW Realty to add credits to your account.” **Continue to payment** disabled.

	Scenario	Steps	Expected result
CR-12	**Admin adds credits** High	1. Admin › Credits › Add credits: test account email, 500, note “QA test”. 2. Confirm the popup. 3. Open the account's Credits page.	Admin message “500 credits added to <name>.” Row “QA test”, originator **MW Realty**, “+500”, “valid until …”.
CR-13	**Admin adds credits to an agency's agent** Medium	1. Add credits using the email of an agent who belongs to an agency.	Message names the **agency**. The credits appear in the agency's wallet, not the agent's.
CR-14	**Extra listing paid with credits** High	1. Use an account whose listing allowance is used up and which has credits. 2. Properties › **Add** › **Use credits** › **Continue with credits**. 3. Fill the form and save.	Form shows the yellow “extra listing paid with credits” note with the balance. After save: listing created; balance lowered by the listing cost; row **Extra listing** with the reference (link opens the listing).
CR-15	**Extra listing – not enough credits** High	1. Same as CR-14 with fewer credits than the cost.	Save refused: “This needs X credits but you have Y. Top up to continue.” No listing created, balance unchanged.
CR-16	**Limit reached, no credits usable** Medium	1. Credits switched off, account with 0 credits and allowance used up. 2. Properties › Add.	Limit message with no credits option (e.g. “You've reached your plan's property limit. Upgrade your plan to add more listings.”).
CR-17	**Premium with credits** High	1. Premium › make a listing premium › **Pay with** › **Credits**. 2. Pick 15 days, start today, confirm.	Summary “Costs N credits · M available”. After confirm: listing is premium for 15 days; plan's premium count unchanged; row **Premium for 15 days** with the reference.
CR-18	**Premium with credits – short** Medium	1. As CR-17 with too few credits.	Summary shows “— K short.” with a **Top up** link (when buying is on). Saving is refused with the “This needs …” message.
CR-19	**Cancel credit Premium before start** High	1. Buy Premium with credits starting tomorrow. 2. Stop/cancel it before tomorrow.	Credits returned: row “Refund — premium cancelled before it started”, “+N”, new validity date.
CR-20	**Stop running credit Premium** Medium	1. Stop a credit-paid Premium that is already live.	Premium ends. No refund row. Changing its dates is refused with the “bought with credits for a fixed length” message.
CR-21	**Ad paid with credits and refunded** Medium	1. With the month's included ads used, book an ad. 2. Admin rejects it.	Booking row “Advertisement: …” with minus credits; after rejection a plus row “Advertisement not approved”.
CR-22	**Oldest batch spent first** Medium	1. Have two batches with different expiry dates. 2. Spend a small amount.	The batch that expires first is reduced (next-expiry line “N expire in D days” goes down).

	Scenario	Steps	Expected result
CR-23	**Credits expire** High	1. Ask a developer to set a test batch's expiry in the past (or Admin sets validity to 1 day and wait). 2. Open Credits.	Row **Expired credits**, originator System, minus the left-over amount. **Expired unused** total rises. Balance drops.
CR-24	**Expiry warning** Low	1. Have credits expiring within 3 days.	Balance card line highlighted (“expire in 2 days” / “expire today”). Sidebar card highlighted.
CR-25	**Search by reference** Medium	1. Type part of a listing reference, press Enter. 2. Type a value that matches nothing.	Only matching rows. No match: “Nothing matches “…””. Totals do **not** change with the search.
CR-26	**Period filters** Medium	1. Click **90 days**, then **12 months**. 2. Set From after To manually.	Active pill highlighted, period line and totals update, URL keeps the filter (reload keeps it). From after To: dates are swapped.
CR-27	**Empty period** Low	1. Pick dates with no activity.	“No credit activity in this period” and “Purchases, add-ons you pay for and expiries show up here.” **Export CSV** hidden. **Buy credits** button shown only if balance is 0 and buying is allowed.
CR-28	**Pagination** Low	1. With more than 20 rows, go to page 2.	20 rows per page, newest first; page number in the URL.
CR-29	**Export CSV** Medium	1. Set a period and search, click **Export CSV**.	File `credit-usage-<from>-to-<to>.csv`. Columns: Transaction Originator, Date, Credits, Credit Balance, Description, Reference, Property Type, Category, Location, Amount paid (AED). Same rows as screen (all pages).
CR-30	**Your plan panel** Medium	1. Compare **New listings** and **Premium** with Plans and Properties.	“used / limit this month” on paid plans (or “N · unlimited”). When full: “… used up until <date> — add more with credits.” **Plans →** opens Plans.
CR-31	**Sidebar card: shows / hides** High	1. Account with 0 credits and plenty of listings left. 2. Then use listings until 10% (min 2) are left; then until full.	Step 1: no card. Near limit: card with tag “N listings left”. Full: tag “Plan limit reached” and button **Buy credits** (or **Add listing with credits** when balance > 0).
CR-32	**Sidebar Buy credits button** Medium	1. Click **Buy credits** on the sidebar card.	Credits page opens and the Buy credits popup opens automatically; the URL no longer contains `?buy=1`.
CR-33	**Credits switched off – account with credits** High	1. Admin › Credits › turn off (popup “Turn credits off?” › **Turn off**). 2. Open Credits as an account that has credits.	Admin message “Credits are OFF — …”. Page shows “Buying credits is paused by MW Realty for now — …”. No Buy buttons anywhere. Calculator, history and spending still work.
CR-34	**Credits switched off – account without credits** High	1. Credits off; account with 0 credits. 2. Check avatar menu, then open `/crm/credits`.	No Credits menu item, no sidebar card. Page shows “Credits aren't available at the moment.” Premium popup offers no Credits option.

	Scenario	Steps	Expected result
CR-35	**Agent inside an agency** High	1. Sign in as an agent who belongs to an agency. 2. Check menu and sidebar; open `/crm/credits`. 3. Open the Premium popup.	No Credits menu item, no card. Page: “Credits are managed by your agency, <Agency>.” Premium popup has no **Pay with** choice.
CR-36	**Agency agent at agency limit** Medium	1. Agency's listing allowance used up. 2. Its agent clicks Properties › Add.	Popup says the agent works on the agency's plan: “… ask <Agency> to upgrade the plan or add credits.” No credits option for the agent.
CR-37	**KYC pending** High	1. Sign in as a KYC-pending Agency (credits on). 2. Open avatar menu › **Credits**.	Menu item has a padlock with tooltip “Unlocks after KYC approval”. Page shows “Your account is pending Super Admin approval.” with **Try again**. No sidebar card.
CR-38	**Super Admin view** Medium	1. Open the CRM from Admin, go to `/crm/credits`.	History of all accounts with the account name on each row; totals for all accounts; no balance card, no Calculator, no Buy credits, no paused banner. CSV has an extra **Account** column.
CR-39	**Admin price change** Medium	1. Admin changes Price of 1 credit, VAT, validity, min/max; **Save price**. 2. Reload Credits, open Buy credits and Calculator.	“Credit settings saved.” New prices, VAT, validity date, min/max and quick picks are used. Maximum below minimum is refused.
CR-40	**Mobile width** Low	1. Open Credits at phone width (~375 px); open both popups.	Cards stack, history rows readable, filters wrap, popups fit the screen; no sideways scrolling.

6. Expected results checklist

- [ ] Balance = credits added − spent − expired; each history row shows the correct running “Balance”.
- [ ] Total in Buy credits = credits × price + VAT, and matches the amount charged in Stripe test mode.
- [ ] Credits are added once per payment, with the right validity date.
- [ ] Extra listing, Premium and ads take the cost shown by the calculator for that listing.
- [ ] Refunds appear for cancelled-before-start Premium and refused/cancelled ads; no refund for stopped Premium.
- [ ] Expired credits are written off as one “Expired credits” row.
- [ ] Switch off: no buying anywhere; accounts with credits still use them; others see nothing.
- [ ] Agency agents never see, buy or spend credits; KYC-pending accounts are locked.
- [ ] Sidebar card appears and hides by the rules in section 2.
- [ ] Search, periods, pagination and CSV give the same rows.

7. Known behaviour (not bugs)

By design:

- An agent inside an agency cannot use the agency's credits; only the agency account can spend them.
- The totals (Credits added / Used on add-ons / Expired unused) ignore the reference search; they follow only the dates.
- Stopping a live credit-paid Premium gives no credits back; only cancelling before it starts does.
- The AED value in the calculator excludes VAT.
- When credits are switched off, Super Admin can still add credits to an account.
- Credits are not a plan feature: the free plan can use them too.
- After paying, credits may take a moment to appear if Stripe is slow (“we're confirming it with Stripe”).

Test-data cautions: use Stripe **test mode** and Stripe test cards only (4242 4242 4242 4242, 4000 0000 0000 0002, 4000 0025 0000 3155). Never enter a real card. Do not switch credits off or change prices on a shared site without telling the test lead. Use test accounts and test listings only.

8. Reporting a bug

Include: module (Credits), role and account, plan, credits on/off, balance before and after, history row (date, description, reference), Stripe test payment ID if shown, steps, expected vs actual, time, screenshot. Use test data only.
