MW REALTY CRM · TESTER HANDBOOK · MODULE 07

Properties

Add, edit, publish and manage residential listings: the listing form, advertising permit, plan limits, quality score, insights and mark as sold / rented

Where: CRM sidebar › Listings › Properties (`/crm/properties` , `/crm/properties/create` , `/crm/properties/:id` , `/crm/properties/:id/edit`). **Who:** Super Admin, Agency, Agent. **Locks:** the menu shows a padlock “Unlocks after KYC approval” until the account’s KYC is approved. Listing Performance needs a plan that includes *Property insights*. Adding listings is limited by the plan (extra listings can be paid with credits if credits are on).

The **Commercial** menu (Module 08) uses the same screens and rules. Everything in this guide also applies there unless Module 08 says otherwise. Super Admin’s permit review is in **Listing Permits** (Module 09). Premium booking is covered in Module 10 and Sold Listings in Module 12.

1. What this module does

Properties is where an agency or agent keeps its residential listings. A listing is shown on the public website only when it is **Active** and its **advertising permit** is verified (or no permit is needed) and not expired. Super Admin sees every listing from every account and can add MW Realty’s own listings.

List screen (`/crm/properties`)

Title “My Properties” (Super Admin: “All Properties”). Search, filters, the **Permit** pills, plan chips, **Grid** / **List** view, bulk actions, drag to reorder, 16 listings per page.

Add / Edit form

A tabbed form: Core details, Property Details, Agent & Agency, Location, Amenities, Easy Access, Attributes, Floor Plans, Images, Brochure, Nearby Places, Publishing. Buttons **Save Property** / **Update Property** and **Cancel**.

Detail screen (`/crm/properties/:id`)

Photo gallery with lightbox, price, stats, Overview per language, Property Details, Amenities, Floor Plans, Location & Nearby, Listing Agent, Listing Info, SEO. Buttons **Back to List** and **Edit**.

Side panels and pop-ups

Listing Performance (Insights / Overview / Leads), **Mark as sold / rented**, **Make a listing premium**, **Move to position**, quality score breakdown on hover.

2. How it works (business rules)

Add listing → Enter permit + Validate → Save → Verified (or approved by MW Realty) → Active = on website

2.1 Permit status of a listing

Every listing has a permit status. It is worked out again on every save. It is shown as a chip on the card photo, a tag in List view, the **Permit** pills above the list, and a banner at the top of the edit form while the listing is not live.

Status (label)	Meaning	On website?
Permit details needed	Emirate or permit details are incomplete (number, expiry date, QR code where required).	No
Not verified	Permit details are complete but the permit is not verified yet. The owner must click **Validate**, or Super Admin approves it.	No
Awaiting approval	Waiting for MW Realty (Super Admin) to approve it. Always the case for DTCM and "None (DIFC/JAFZA only)" permits; for all listings if the environment requires Super Admin approval.	No
Verified	Permit verified (online or by MW Realty), or no permit needed. The listing can be live.	Yes, if Active
Taken down	Super Admin took it down. It stays offline until the permit details are changed and saved.	No
Permit expired	The permit expiry date has passed.	No

The pill for the "Not verified / Awaiting" group is labelled "Not verified / approval" when Super Admin approval is not required for every listing, and "Awaiting approval" when it is. A listing imported from Property Finder that is still in review shows "In MW Realty review".

2.2 Which permit is needed (Core details)

Emirate	Permit	Fields shown	Validate button?
Dubai, Permit type **RERA** (default)	DLD advertising permit	Real estate company license (read-only), RERA permit number, Permit expiry date, Permit QR code, Permit verification link	Yes
Dubai, Permit type **DTCM**	Holiday-home permit, **rent only**	DTCM permit number, Permit expiry date, Permit verification link	No – needs Super Admin approval
Dubai, Permit type **None (DIFC/JAFZA only)**	No permit	Message "No advertising permit is needed for this listing."	No – needs Super Admin approval
Abu Dhabi	ADREC permit	Broker license (read-only), ADREC permit number, expiry, QR code, link	Yes
Northern Emirates, City **Al Ain**	ADREC permit	Same as Abu Dhabi	Yes
Northern Emirates, City **Any city except Al Ain**	No permit	"No advertising permit is needed for this listing."	No – verified on save

- **License:** the permit is checked against the account's license (RERA ORN or ADREC brokerage number from the company profile). An agency agent uses the agency's license. If none is on file, a yellow warning explains who must add it and the **Validate** button is disabled. The listing can still be saved.
- **Validate:** sends the number to DLD / ADREC. Results: *Verification successful* (green), *Verification failed*, *Not verified online* (service not connected or not reachable – save anyway, Super Admin checks it), or *Check the permit number*. On success the permit number becomes read-only, the button changes to **Refresh**, and fields the permit covers (Category, Offering type, Property type, Property location, bedrooms, size) are filled from the permit and locked with a padlock. The result must be saved within about 2 hours.

- **Changing the emirate, permit type, city or number** after a successful Validate resets it to "Ready to validate".
- **One permit = one listing.** A permit number already used on another listing is rejected.
- **Locked fields after verification / approval:** once a permit is verified online, or the listing is Verified, Agency/Agent users cannot change Emirate, Permit type, City, Category, Offering type, Property type, Property location, Rooms, Property size and Permit number (padlock, info bar "…must stay as they are on the permit. Need one changed? Raise a ticket"). Everything becomes editable again when the listing is Taken down, the permit expired, or the permit expires within 30 days (renewal). Super Admin can always edit.
- **Approval survives normal edits:** editing description, photos, amenities etc. keeps a Verified listing live. If Super Admin approval is required, changing price, permit details or other permit fields sends the listing back to Awaiting approval (offline).

2.3 Active switch and website visibility

- A listing is on the website (`/properties` list and `/property-details/<slug>`) only while the **Active** switch is on. The switch can only be on while the listing is Verified, not sold and the permit is not expired. Saving with "Active (visible on site)" ticked on an unverified listing saves it as Inactive.
- Turning the switch on for a listing that cannot go live is refused with a message (see PR-24).
- When Super Admin approves a listing, it is switched on automatically.
- Expired permits: a daily job (shortly after midnight UAE time) takes Verified listings with an expired permit offline (status "Permit expired") and emails/notifies the owner and assigned agent. A reminder is sent once, 7 days before the expiry date.
- Website shows the permit number and QR code on the property page. **Unit number** and **Owner name** are internal only and never shown. Brochure and the downloadable floor plan file are given to visitors only after they submit their contact details.

2.4 Plan listing limits and credits

- The plan chip on the list (e.g. "Starter 3 / 5 added this month") shows usage. **Properties and Commercial share one allowance.**
- **Paid plans:** a number of *new* listings per calendar month. Deleting a listing does not give the slot back. Resets on the 1st of next month.
- **Free plan:** a cap on listings held at one time.
- An **agency agent** uses the agency's plan; their listings belong to the agency and count against it.
- When the allowance is used up, **Add Property** opens the pop-up "You've used your plan's listings" (agency agent: "<Agency>'s listings are used up") with **Use credits** (**Continue with credits**, **Buy credits**, **See costs**) if credits are on, **Upgrade your plan** › **Compare plans**, and "Or wait — your N new listings come back on <date>".
- Continuing with credits opens the form with a yellow bar "…This listing will be added as an extra listing paid with credits. You have N credits…". Credits are charged on save; the cost depends on menu, offering type, property type and price. Extra listings paid with credits do not count toward the plan allowance.
- Super Admin has no limit.

2.5 Quality score

Each listing gets a score out of 100 (ring on the card, "Quality" column in List view). Hover shows the breakdown; green ≥ 80, amber 50–79, red < 50.

Check	Max	Full points when…
Title	10	30–90 characters (15+ = 6, any = 3)
Description	15	150+ words (80+ = 10, 30+ = 5)

Check	Max	Full points when…
Images	15	10+ photos (6+ = 10, 3+ = 6, 1+ = 3)
Floor plan & video	5	Floor plan (3) + video or 360 link (2)
Listing details	20	Property type, price, area, bedrooms, bathrooms, completion status, furnishing, 3+ amenities, key features (bedrooms/bathrooms not needed when Category is Commercial)
Location	15	City (3), community (3), address (3), latitude + longitude (6)
Listing verification	20	Permit number entered and listing Verified (number only = 10)

2.6 Other rules

- **Reference** is auto-generated (e.g. `RERA…`), read-only and never changes.
- **Display order:** the website lists listings in the CRM order. Drag a card by its grip (only on the unfiltered list) or use **Move to** › Top / Bottom / Position…
- **Photos** are converted to JPEG; the first photo is the featured image. The account's watermark may be added if set up in Listing Settings.
- **Duplicate unit:** the same account cannot list the same Unit number in the same Property location for the same offering twice while the first is not sold.
- **Translations:** Title, Address, City and Country are required in **every** active site language. If auto-translate is set up, text typed in the first language is translated into the others.
- **Notifications:** when a listing goes to Awaiting approval, Super Admin gets a bell + email and the owner gets "Listing sent for approval". Approve, take down, expiring and expired also notify the owner and assigned agent (bell + email).
- **Mark as sold / rented** removes the listing from the website and from this list, moves it to Sold Listings, and moves the buyer lead to the won stage.

3. Who can do what

Action	Super Admin	Agency	Agent
Open Properties (KYC approved)	**Yes**	**Yes**	**Yes**
KYC pending	**n/a**	**No (padlock)**	**No (padlock)**
Listings shown	**All accounts**	**Own**	**Own + assigned (1)**
Add listing	**Yes, no limit**	**Plan / credits**	**Plan / credits (2)**
View / Edit	**All**	**Own**	**Own + assigned**
Change permit-locked fields	**Yes**	**No (while locked)**	**No (while locked)**
Active switch, Delete, Move to / drag, Bulk actions, Premium	**All**	**Own**	**Own only (3)**

Action	Super Admin	Agency	Agent
Mark as sold / rented	**Yes**	**Own**	**Own + assigned**
Agent filter	**Yes**	**Yes**	**No**
Assign agent in form	**Any agent**	**Own agents**	**Fixed to self**
Listing Performance	**Yes**	**Plan feature**	**Plan feature**

KYC pending: the menu has a padlock and the page shows “Your account is pending Super Admin approval.” (1) An agency agent also sees agency listings assigned to them. (2) An agency agent uses the agency’s plan; the new listing belongs to the agency. (3) Not agency-owned listings, even ones the agent created. Super Admin listings have no owner (“MW Realty”). Listing Performance needs a plan that includes Property insights (agency agent: the agency’s plan).

4. Fields and validation

Fields marked * in the form are checked before saving. If one is empty the form opens the right tab, focuses the field and shows a red banner, e.g. *Please fill in "Property Type" — it's required before this can be saved.* or *Please fill in "Title (EN)" — 3 required fields are still empty. Save will work once they're all filled.* Server errors are listed in a red box at the top and the form opens the tab of the first error.

Tab · Field	Required	Rules / limits
Core details · Emirate	Yes	Default Dubai. Message if empty on server: “Choose the emirate — it decides which advertising permit the listing needs.”
Core details · City (Northern Emirates)	Yes	Al Ain / Any city except Al Ain. “Choose the city.”
Core details · Permit number	For a permit (*)	Max 64; letters, numbers, dash, slash only: “The permit number may only contain letters, numbers, dashes and slashes.” Unique across all listings. Empty does not block saving – listing becomes “Permit details needed”.
Core details · Permit expiry date, Permit QR code	For a permit (*)	Same as above – missing makes the listing “Permit details needed”. QR: image, max 2 MB (RERA and ADREC only).
Core details · Permit verification link	No	Valid http/https URL.
Core details · Category, Offering type	Yes	Buttons from Master › Property Options. DTCM permit: Sale is disabled; server message “A DTCM permit is for holiday homes, which can only be listed for rent.”
Core details · Rental period	Shown for Rent	From option list. Cleared when Offering type is not Rent.
Core details · Property type, Property location	Yes	Searchable pickers from option lists.
Core details · Completion status, RERA ID	No	RERA ID max 255.
Core details · Available	No	Immediately / From date. From date: at least one date (“Pick at least one available date, or choose "Immediately".”), max 60 dates, past dates not selectable, shown as removable chips.

Tab · Field	Required	Rules / limits
Core details · Active (visible on site)	No	On by default for a new listing; only stays on if the listing can go live.
Property Details · Title (per language)	Yes	Max 255, every active language.
Property Details · Key Features / Description	No	5,000 / 100,000 characters. Key features: one per line (shown as highlights).
Property Details · Slug	Yes	Fills from the first language title; editable; **Use title** restores it. Letters, numbers, dash, underscore; unique. Preview: /property-details/<slug>.
Property Details · Rooms, Bathrooms	No	Whole numbers 0–1000 (0 = Studio).
Property Details · Property size (sqft), Parking, Garage	No	Whole numbers ≥ 0.
Property Details · Unit number	No	Max 100; internal only; duplicate check (see 2.6).
Property Details · Year built	No	1800–2200.
Property Details · 360 URL link, Video tour URL	No	Valid URL.
Property Details · Property price, Currency	Yes	Price ≥ 0. Currency default AED, exactly 3 letters.
Property Details · Number of cheques	No (Rent only)	1, 2, 3, 4, 6 or 12.
Agent & Agency · Assigned Agent	No	Agency: own active, approved agents or “— No agent (enquiries round-robin across your agents) —”. Invalid choice: “Choose an active, approved agent from this agency.”
Location · Address, City, Country (per language)	Yes	Address max 1000, others max 255. Community optional. “Full Address Preview” updates live.
Location · Latitude / Longitude	Yes	Numbers, −90…90 / −180…180.
Amenities / Easy Access / Attributes	No	Tick options; search box when more than 8. Switched-off options show “No longer offered for new listings” only if already ticked.
Floor Plans · rows	No	New listing starts with 3 blank rows. Rows without a Title are not saved. Max 50 rows; image max 4 MB; Sqft From/To whole numbers.
Floor Plans · Downloadable Floor Plan File	No	Max 10 MB.
Images	No	Image files only, max 4 MB each, up to 30 new photos per save. Drag to reorder after **Reorder**.
Brochure · Brochure File	No	PDF, JPG, PNG, WEBP, DOC, DOCX, XLS, XLSX, CSV, PPT, PPTX; max 20 MB.
Nearby Places	No	Pick Type, then Place, click **Add**; max 100. **New Place** / **Manage** open in a new tab.

Tab · Field	Required	Rules / limits
Publishing · Published At, Display Order, SEO	No	Meta Title / OG Title max 255; Meta Description / Keywords / OG Description max 500; Canonical URL valid URL; OG Image image max 4 MB.

5. Test scenarios

Priority: High core flow / data loss / access · Medium · Low cosmetic. “Approval required” means the environment is set so every listing needs Super Admin approval – ask the project lead which mode your test server uses, and whether online DLD / ADREC validation is connected.

	Scenario	Steps	Expected result
PR-01	**KYC-pending account** High	1. Sign in as an Agency whose KYC is not approved. 2. Look at the sidebar, then open `/crm/properties`.	Properties shows a padlock with tooltip “Unlocks after KYC approval”. The page does not load listings; it shows “Your account is pending Super Admin approval.” with **Try again**.
PR-02	**List screen loads** High	1. Sign in as an approved Agency with listings. 2. Open Properties.	Title “My Properties”, plan chip and Premium chip, up to 16 cards, “Showing 1–16 of N” and pagination. Only this account’s residential listings appear (no Commercial ones).
PR-03	**Empty state** Low	1. Use a new approved account with no listings.	“No properties yet. Add your first listing.” The link opens the Add form (or the plan pop-up if the allowance is 0).
PR-04	**Create a minimal listing (RERA, no permit yet)** High	1. Click **Add Property**. 2. Core details: Emirate Dubai, Permit type RERA, leave permit empty; pick Category, Offering type, Property type, Property location. 3. Property Details: Title, Price. Location: Address, City, Country, Latitude, Longitude (every language). 4. Click **Save Property**.	Toast “Property created successfully. It stays off the website until the permit details are added and validated in Core details.” Back on the list; card shows chip “Permit details needed” and bar “Add the permit details to go live” with **Add**. Status is Inactive. Reference auto-filled.
PR-05	**Required fields check** High	1. Open Add form, leave everything empty, click Save. 2. Fill the field it points to, Save again; repeat.	Red banner names the first missing field and how many are empty; the right tab (and language) opens and the field turns red until typed in. Nothing is saved until all are filled.
PR-06	**Translations required in every language** Medium	1. With 2+ site languages, fill Title/Address/City/Country only in the first language. Save.	Banner “Please fill in "Title (AR)"…” (code of the second language); the language pill dot shows “Partly filled”/“Empty”. If auto-translate is set up, typing in the first language fills the others after a short pause (“Auto-filled … from …”). If not, the bar says “Auto-translate isn't set up yet…”.
PR-07	**Slug follows title, unique** Medium	1. Type a Title; watch Slug. 2. Edit Slug by hand, then click **Use title**. 3. Save with a slug already used by another listing.	Slug fills from the title until edited; **Use title** resets it. Duplicate slug is rejected with a slug error (e.g. “The slug has already been taken.”) on Property Details.
PR-08	**Validate a RERA permit – success** High	1. Account with ORN in profile. Core details › RERA permit number = valid test permit (from project lead). 2. Click **Validate**, then save.	“Checking…” then “Verification successful”. Number read-only, button **Refresh**, permit fields filled and padlocked, expiry filled. After save the listing is “Verified” (or “Awaiting approval” if approval is required). Quality “Listing verification” 20/20 when Verified.

	Scenario	Steps	Expected result
PR-09	**Validate – failure / not connected** High	1. Enter an invalid test permit number, click Validate. 2. Repeat on a server where DLD validation is not connected.	Invalid: “Verification failed” with the authority’s reason. Not connected: “Not verified online — Automatic DLD validation isn't connected yet — save the listing and Super Admin will check the permit before approving it.” Saving gives status “Not verified”; listing stays offline.
PR-10	**Permit number format and empty** Medium	1. Click Validate with the number empty. 2. Enter `12#34`, Validate; then Save.	Empty: “Enter the permit number.” under the field. Bad characters: “Check the permit number — The permit number may only contain letters, numbers, dashes and slashes.” Save shows the same rule.
PR-11	**Permit already used** High	1. Enter a permit number already saved on another listing; Validate; Save.	Validate: “This permit is already used by listing <ref>. Each permit covers one listing only.” Save is rejected: “This DLD permit number is already used by another listing. Each advertising permit covers one listing.”
PR-12	**No license on file** Medium	1. Agency without RERA ORN in profile opens Add form (Dubai, RERA).	License box shows “No license on file” and a yellow note “Your company's RERA ORN isn't in your profile yet… You can still save the listing — MW Realty checks the permit before it goes live.” with **Open profile**. **Validate** is disabled. Independent agent sees the “join your brokerage” text.
PR-13	**Changing permit inputs resets Validate** Medium	1. After a successful Validate (before saving), change Emirate or Permit type.	Status returns to “Ready to validate — Enter the permit number above.”; the listing will not be saved as verified.
PR-14	**DTCM is rent only, needs approval** High	1. Dubai › Permit type DTCM with Offering type Sale. 2. Fill DTCM number + expiry, Save.	Offering type switches to Rent and Sale cannot be picked. No Validate button; QR not shown; info “After you save, MW Realty checks and approves this listing before it shows on the website.” Saved as “Awaiting approval”; toast ends “It was sent to MW Realty for approval and goes live once approved.” Super Admin gets a notification.
PR-15	**None (DIFC/JAFZA) and Northern Emirates** Medium	1. Dubai › None: save. 2. Northern Emirates without city: save. Then “Any city except Al Ain”: save. Then Al Ain.	None: “No advertising permit is needed…”, saved as Awaiting approval. No city: “Choose the city.” Any other city: no permit, saved as Verified and can be Active (Awaiting approval if approval is required). Al Ain: ADREC fields with Broker license and Validate.
PR-16	**Permit details complete but not verified** Medium	1. RERA: enter number, future expiry and QR image, do not Validate. Save.	Status “Not verified” (or “Awaiting approval”). Card bar “Permit not verified — validate it to go live” with **Validate**; edit form banner tells to click Validate then Update.
PR-17	**Expired permit date** Medium	1. Save a listing with a permit expiry date in the past.	Status “Permit expired”, toast “…The permit has expired, so it stays off the website — enter and validate the renewed permit.” Cannot be switched Active.

	Scenario	Steps	Expected result
PR-18	**Locked fields on a verified listing** High	1. As Agency, edit a Verified listing whose permit expires in more than 30 days. 2. Try to change Property type, Rooms, Permit number. 3. Open the same listing as Super Admin.	Agency: blue bar “This listing's permit is verified, so the fields marked 🔒 must stay as they are on the permit.”; those fields are read-only and saved values do not change. Super Admin can edit them.
PR-19	**Edit non-permit field keeps it live** High	1. Edit an Active, Verified listing: change Description and add a photo. **Update Property**.	“Property updated successfully.” Status remains Verified and Active; still on the website.
PR-20	**Price change when approval is required** Medium	1. (Approval required mode) Change Property price on an approved listing, Update.	Listing becomes “Awaiting approval” and goes offline; Super Admin is notified (resubmission).
PR-21	**Agent assignment (Agency)** High	1. As Agency, Agent & Agency tab: pick one of your agents, save. 2. Edit and choose “— No agent … —”, save.	Card shows “Agent <name>”, then “Agency listing · no agent”. With no agents: note “No active agents yet — that's fine…” with **Manage agents**. Website contact follows the assigned agent (if active and approved), otherwise the agency.
PR-22	**Agent login form** Medium	1. As an agency agent, open Add Property, Agent & Agency tab. Save a listing.	Agent and Agency fields are filled and disabled. The listing is saved under the agency, assigned to this agent, and counts against the agency plan.
PR-23	**Super Admin agent pickers** Medium	1. As Super Admin, Add Property › Agent & Agency: choose an Agency, then an Agent. 2. Pick an inactive / unapproved agent and save.	Choosing an agency narrows the agent list. Invalid agent: “Choose an active, approved agent from this agency.” A Super Admin listing has no owner (“MW Realty”).
PR-24	**Active switch rules** High	1. On the list, switch on a “Not verified” listing. 2. Switch on an “Awaiting approval” one. 3. Switch a Verified listing off and on.	1: switch flips back; toast “This listing can't go live yet (not verified). Its advertising permit has to be verified first — open the listing and use Validate in Core details.” 2: “…(awaiting approval). MW Realty has to approve it first.” 3: works; website hides/shows it.
PR-25	**Website visibility** High	1. Note a Verified + Active listing’s slug; open `/property-details/<slug>` and `/properties`. 2. Switch it Inactive and reload.	Active: visible with title, price, photos, permit number/QR, agent contact; Unit number and Owner name are not shown. Inactive: not listed and the detail page is not available.
PR-26	**Images: add, limits, featured** High	1. Images tab: **Select Images** (or drop) 3 photos and one PDF. 2. Try a photo larger than 4 MB. Save.	Only images are added (PDF ignored); first thumbnail says FEATURED. Over 4 MB: image error on the Images tab. After save the first photo is the card thumbnail.
PR-27	**Images: reorder and delete** Medium	1. Edit a saved listing, click **Reorder**, drag the 3rd photo first, click **Done**. 2. Click × on a saved photo and confirm. Then **Remove All**.	Order of saved photos is stored immediately (card thumbnail changes). “Delete This Image?” / “Remove All Gallery Photos?” confirm; deletion happens at once, even without clicking Update.

	Scenario	Steps	Expected result
PR-28	**Floor plans and file** Medium	1. Fill one row (Title, Sqft From/To, image), leave another blank, **Add Row**, remove one. 2. Upload a Downloadable Floor Plan File. Save; open the detail page.	Only rows with a Title are saved. Detail page shows Floor Plans with images, sizes and a **Download** button. On edit the file shows “Current file (PDF)” and **Replace**.
PR-29	**Brochure** Low	1. Upload a .zip, then a PDF under 20 MB. Save.	.zip cannot be chosen / is rejected; PDF saved and “View current brochure” appears on edit.
PR-30	**Amenities, Nearby Places** Low	1. Tick 3 amenities; search in the list. 2. Nearby Places: Type, Place, **Add**; add the same place again; remove a chip. Save.	“N selected” counter updates. Same place is not added twice. Detail page shows the chips grouped by type.
PR-31	**Available dates** Low	1. Choose **From date**, add two dates, remove one; try a past date. 2. Choose From date with no date and save.	Dates appear as sorted chips; past dates cannot be picked. No date: “Pick at least one available date, or choose "Immediately".”
PR-32	**Duplicate unit** Medium	1. Save a second listing (same account) with the same Unit number, Property location and Offering type.	“Unit <no> in this location is already listed for sale as <ref>. Edit that listing instead of adding it again.”
PR-33	**Plan limit reached** High	1. Use an account whose plan chip shows used = limit. 2. Click **Add Property**.	Chip turns red with **Upgrade**. The pop-up “You've used your plan's listings” opens instead of the form, with the options described in 2.4. Without credits only **Upgrade your plan** is offered; opening `/crm/properties/create` directly returns to the list with “You've added all N listings your plan allows this month…” / “You've reached your plan's property limit…”.
PR-34	**Extra listing with credits** High	1. Plan full, credits on, test balance available: **Continue with credits**. 2. Save the listing. Then try with a balance lower than the cost.	Form shows the yellow credits bar. Save charges credits (Credits history shows “Extra listing” linked to the listing); plan chip count unchanged. Low balance: “This needs N credits but you have M. Top up to continue.” and nothing is saved.
PR-35	**Agency agent at agency limit** Medium	1. Agency plan full; sign in as its agent; click Add Property.	Pop-up “<Agency>'s listings are used up” with “Ask <Agency>” text; no credit purchase option for the agent.
PR-36	**Search** Medium	1. Search by part of a title, a reference no, a community, a RERA ID (any case). 2. Clear with ×.	Matching listings; footer “N results for “…” · drag to reorder is off while searching…”. Super Admin can also search by agent / agency name. No match: “Nothing matches “…”. Clear search & filters.”

	Scenario	Steps	Expected result
PR-37	**Filters** Medium	1. Apply Buy/Rent, Active/Inactive, Premium only, and (Agency/Super Admin) agent incl. “No agent (agency listings)”. 2. Click **Clear filters**; refresh the page with filters set.	Each filter narrows the list and is kept in the URL (survives refresh). Agent picker searches and loads more on scroll. Agents do not see the agent filter.
PR-38	**Permit pills** Medium	1. Click the “Permit details needed” pill, then click it again.	Only those listings show; the pill is highlighted with ×; clicking again shows all. The red number next to “Permit” counts listings needing the account’s action (not shown for Super Admin).
PR-39	**Grid / List view** Low	1. Switch to **List**, refresh, switch back to **Grid**.	List shows columns Listing, Details, Quality, Agent, Leads, Price, Status and a ⋯ menu (Edit, View, Mark as sold/rented, Delete). Choice is remembered on this device.
PR-40	**Reorder: drag and Move to** Medium	1. Unfiltered list: drag a card by its grip. 2. **Move to** › Top; › Position…, enter 0 and then a valid number on page 2.	New order is saved and matches the website order. Position 0: “Enter a position between 1 and N.” Valid move opens the page where the listing landed and highlights it. Drag grip is hidden while searching/filtering.
PR-41	**Bulk actions** High	1. Tick **Select all → Bulk Actions (N)** › Mark Inactive. 2. Select a mix of Verified and not verified listings › Mark Active. 3. Select 2 › Delete Selected › confirm.	Mark Inactive switches all off. Mark Active only switches on listings that can go live (others stay Inactive, no error). Delete asks “Delete 2 listings?” (“…This can't be undone.”, button “Delete 2”) and removes them with photos.
PR-42	**Delete one listing** High	1. Card trash icon › confirm “Delete this property?”.	Listing and its photos are removed; not on website. On a paid plan the monthly “added” count does not go down.
PR-43	**Agency agent limits on agency listings** Medium	1. As agency agent, on an agency-owned listing assigned to you: Edit, toggle Active, Delete, Move to.	Edit and Mark as sold work. Toggle, delete and move are not allowed for the agent (only the agency owner can). Report if the screen gives no clear message.
PR-44	**Quality score** Medium	1. Hover the ring on a card; note the breakdown. 2. Add 10 photos, 150+ word description, floor plan, video link; save.	Hover shows Title, Description, Images, Floor plan & video, Listing details, Location, Listing verification with points. Score and colour rise as per section 2.5.
PR-45	**Listing Performance** Medium	1. Paid plan with Property insights: click the chart icon or Leads. 2. Check Insights, Overview, Leads tabs. 3. Repeat on a plan without it.	Panel “Listing Performance”: Impressions, Listing clicks, Lead clicks, Leads, conversion, last 30 days chart (or “No views yet…”), quality with “Improve next”; Overview with Assigned to / Created by / Updated by, **Edit listing**, **View on website**; Leads list links to the lead. Without the feature: toast “Property insights are included in paid plans. Upgrade your plan to see listing performance.”

	Scenario	Steps	Expected result
PR-46	**Mark as sold** High	1. Card handshake icon › Outcome Sold, Sold price, Sale date, pick an existing test lead (“Enquired on this listing” first). 2. Upload title deed and Form F/MOU (PDF/JPG/PNG ≤ 10 MB). **Mark as sold**.	Toast “Marked sold. It is now off the website and listed under Sold Listings.” and the Sold Listings screen opens. Listing gone from Properties and website; lead moved to the won stage.
PR-47	**Mark as rented / validation** Medium	1. On a rent listing open the pop-up (Outcome defaults to Rented). 2. Submit with no lead picked; then New buyer without email and phone; then without documents. 3. Set Lease ends before Rented on.	Messages: “Pick a lead from the list, or switch to “New buyer”.”, “Add an email or phone number for the buyer.”, “Upload both documents: … is missing.” (contract label “Ejari (official DLD document)”). Lease end before start is rejected. Future sale date cannot be picked.
PR-48	**Detail screen** Medium	1. Open **View** on a full listing; click a photo; switch Overview language; click Read more. 2. Open `/crm/commercial/:id` using a residential id.	Lightbox with arrows and “n / N”; language tabs; Property Details incl. DLD Permit and Permit Review; map when coordinates are set. Wrong-menu URL redirects to `/crm/properties/:id`.
PR-49	**Super Admin view** Medium	1. Open Properties from Admin › CRM.	“All Properties”, listings of every account, owner name on cards, no plan chip, search includes agent/agency. Agent filter lists all agents. Super Admin listing with complete permit that needs approval is approved on save.
PR-50	**Sidebar badge** Medium	1. As Agency, have one listing Taken down (ask Super Admin) or with an expired permit.	Red number on the Properties menu = listings Taken down + Permit expired (not sold). It goes away after the permit is fixed and saved.
PR-51	**Notification on take-down** Medium	1. Super Admin takes down a test listing (Module 09). Check the owner’s bell and email. 2. Owner opens the edit form.	Owner receives “Listing taken down”. Edit form shows red banner “MW Realty took this listing down…” with **Open permit details**; fields are editable again. After changing the permit and Update, status leaves “Taken down”.
PR-52	**Mobile width** Low	1. Open list, form and detail at about 375 px width.	Cards stack in one column, form tabs remain usable, tables scroll inside their box; no page-wide horizontal scroll.

6. Expected results checklist

- [ ] A listing appears on the website only when Active and Verified (permit verified or not needed) and not expired or sold.
- [ ] Required fields block saving with a clear banner; permit fields do not block saving but set “Permit details needed”.
- [ ] Validate success locks permit fields; failure / not connected messages are clear; one permit per listing.
- [ ] DTCM forces Rent and needs approval; None and Northern Emirates rules behave as in 2.2.
- [ ] Plan limit, credits pop-up and credit charge work; Properties and Commercial share the allowance.
- [ ] Images, floor plans, brochure, nearby places, translations and SEO save and show on the detail page.

- [ ] Search, filters, permit pills, Grid/List, pagination, drag and Move to work and survive refresh where stated.
- [ ] Bulk Activate skips listings that cannot go live; delete removes listings and photos.
- [ ] Quality score and Listing Performance match the listing; insights are blocked on plans without the feature.
- [ ] Mark as sold / rented removes the listing from the website and list, and closes the lead as won.
- [ ] Role scoping: each account sees only its own listings; Super Admin sees all.

7. Known behaviour (not bugs)

By design:

- Permit number, expiry and QR have a red * but saving without them is allowed – the listing is saved as “Permit details needed” and stays offline.
- Ticking “Active (visible on site)” on a new, unverified listing still saves it as Inactive.
- On test servers DLD / ADREC online validation may not be connected; Validate then always says “Not verified online” and Super Admin must approve the listing.
- Deleting a listing on a paid plan does not give the monthly slot back.
- Photo delete, Remove All and photo reorder on a saved listing apply immediately, even if you then click Cancel.
- A listing that needs no permit can never get the 20 “Listing verification” quality points.
- Published At is shown as the listing date; it does not schedule publishing.
- The sidebar badge is on the Properties menu only, but it also counts Commercial listings.
- An agency agent’s new listing belongs to the agency, so the agent cannot delete it or switch it on/off later.

Test data cautions: use only test permits supplied by the project lead – do not validate real permit numbers of other brokers. Use fake buyers and sample documents (no real title deeds, Ejari or IDs). Do not buy credits with a real card. Do not activate test listings on the live website.

8. Reporting a bug

Include: module (Properties), role and account, plan, KYC state, listing reference / ID, permit type and status, approval mode of the server, steps, expected vs actual, exact message, time, screenshot. Use test data only.
